

Across

- 2. This process removes suspended solids from water
- 3. This chemical is added to water to kill bacteria
- 6. Roughly 70% of the body is made up of this liquid
- 8. One water molecule contains one atom of this element
- 9. Frozen water
- 10. Opposite of dry
- 11. Water that falls from the sky

Down

- 1. This chemical is added to water to help prevent tooth decay
- 4. One water molecule contains two atoms of this element
- 5. The process of water turning into a vapour
- 7. Water is not an acid or a base. It is
