

Referencing using www.citethisforme.com

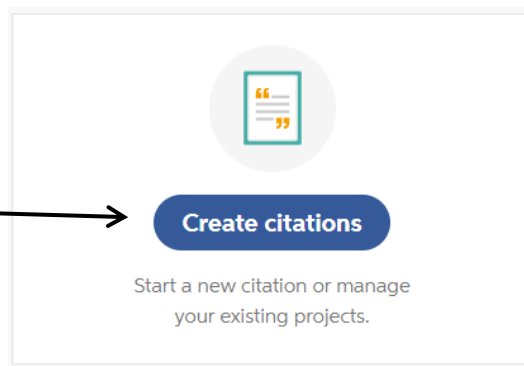

Cite This For Me

Free to use, can even make an account using your school email.

Step 1:

On the homepage, click 'Create Citations'

Step 2:

Select the source you wish to reference. Other source formats are in the 'More' tab, depending on where you got your information from

Referencing a website:

Paste the URL (Website Address) into the bar and click search

Then click 'Cite'

Make sure ALL yellow boxes are filled in and click 'Complete Citation'

The reference will then appear in your reference list

Step 3: Reference List (Bibliography)

Your generated references will appear in your reference list.

If you hover your mouse over a reference, you will see 'Copy citation' and 'Copy in-text citation'

The citation goes in the reference list at the end of your project.

Riley, H., Pommeresche, R. and Eltun, R. (2008) 'Soil Structure, organic matter and earthworm activity in a comparison of cropping systems with contrasting tillage, rotations, fertilizer levels and manure use', *Agriculture, Ecosystems & Environment*, 124(3-4), pp. 275-284. doi:10.1016/j.agee.2007.11.002.

The in-text citation goes into your report after the text you wish to reference.

Earthworms are an important organism on the farm as they are responsible for improving soil structure (Riley et al., 2008).
