

Unlock Limitless Learning

Supporting PDLS College, Bagenalstown

Why

This quote delivers a very important message in why there's a need for the introduction of a 1:1 student device programme.

Tomorrow belongs to the people who prepare for it today.

We know that technology is playing an increasingly important part in the workplace, in education and in our everyday lives. That's not going to change and in fact it's only going to become more embedded in everything we do.

If we ignore that fact, or don't prepare our students for it, we are not preparing for tomorrow and we are already putting those students at a disadvantage.

What is really important to know at this point is, we are not talking about changing all of the good things that happens and has happened in education and the classroom, instead we are talking about using technology when and where it benefits the learning to do so. This is called blended learning, where we blend technology with traditional ways of teaching and learning.

The curriculum for both Junior Cycle and Senior Cycle, has changed and will continue to change, and technology becomes an ever more important part of supporting students and teachers with this change.

Reliance on smart phones has never been the long term answer for students and teachers to utilise technology in the classroom, instead it became an important stopgap measure. The forthcoming ban on mobile phones raises the opportunity for a school to introduce devices that are:

1. Managed, Secured, Monitored and Set as Educational Devices Only.
2. The same. Each student has the same experience, with a device that has all of the essential features required for an educational device. Differentiation is also removed, where there's no disparity with for example: one student having a very expensive top of the range phone, and another having what might be deemed a more lower end device.
3. Fully Supported. A school and its teachers need to be allowed to fully focus on teaching and learning and not in the daily maintenance and support of any essential technologies. Olive's service and supports, ensure that everyone is fully afforded that focus.

Education First, Education Only, Microsoft Partner

With Olive for Education, One to One means schools, students, and parents get end-to-end expert care and support. From engaging with your teachers and school community to delivering secure, customised devices to each individual student, technology needs to work for you. And with Olive for Education, you can have full confidence that it works.

Every educator, institution, student, and family we collaborate with is more than a customer; they are our valued partners. Those partnerships are built on mutual respect, trust, and a shared objective of crafting enriched learning experiences.

What you expect from One to One, plus much, much, more

Olive for Education bring you all of the fundamental parts of One to One that you've come to expect, including:

- Expert Support and Guidance
- Presentations and Communications with Parents
- An Online Store customised to each school where parents buy the One to One bundle
- Full Safe, Secure Set Up and Configuration through an unrivalled technical team and resource
- Ongoing School, Parent and Student Support and Device Management

What differs with Olive for Education, is that our people are empowered with the knowledge and experience needed to give you the help you need, when you need it. In addition to what's fundamental, each school and their One to One community, also gets:

- Expertise across all essential areas, including technical and administration
- Customer Service Excellence
- Access to innovative products, services and solutions

We understand that every school, every teacher, and every student is unique, and our support and services are exclusively crafted to be something you can count on.

Unique Services

Our unique services to our One to One bundles, also include:

1. Classroom Management Software
2. Extended Warranty with Accidental Damage Cover
3. Parent Payment Plans
4. In-School Deployment

Classroom Management Software

Our Classroom Management tools are included in our One to One bundles, helping teachers to easily Monitor, Manage and Safeguard student devices during class time.

Customised for Olive for Education Schools, the Classroom Management tools help:

- Students to remain focused
- Teachers to have full peace of mind
- Remove distractions
- Classes run more efficiently

Teachers can:

- Fully monitor each students device, seeing all screens at once
- Bring students back to where they should be, all at the touch of a button
- Lock students screens, either individually, or all at once
- Launch an App or website / webpage for the entire class at once
- Take control of devices with ease. Easily assist a student or take control of their device
- Take training on how to best use these features and much more

Extended Warranty with Accidental Damage Cover

Insurance is costly and the claims process can be a frustrating one. The claims process can also be unnecessarily long, leaving a student without a device for weeks at a time.

A 5 Year Extended Warranty including Accidental Damage, is instead be included in our One to One bundle as standard and without any extra cost to parents.

In addition to the included Warranty, parents are of course, free to make their own arrangements for device insurance, either through their home insurance or through any number of online device insurance providers.

Parent Payment Plans

Parents have the choice of using different payment methods, summarised as follows:

- **Single Card Payment:** This allows parents to pay in full, with a single payment
- **Olive Payment Plan:** This option allows parents to make staged payments, up until the time where students will receive their device and bundle. Parents pay their own chosen amount, whenever they wish. There is no interest charged on this option and it's not a credit facility, as full payment is made before deployment.

- **Humm Finance Plan:** This option is available through a 3rd Party partner, Humm Finance. Monthly payments can be made over 3 years. This is a credit facility and we highlight that it can be an expensive option, but it is in place for parents who want a longer-term payment option.

In-School Deployments

Each student in our 1:1 Partner School, receives their fully configured and secured device, during an in-school deployment session. This ensures that each student leaves that session, ready to start classes immediately afterwards. Any potential issues that might come up with a students devices, are fully addressed and resolved during the deployment session, ensuring there's no disruption to any teaching and learning from that point onwards.

Extended Warranty with Accidental Damage Cover

Insurance is costly and the claims process can be a frustrating one. The claims process can also be unnecessarily long, leaving a student without a device for weeks at a time.

A 5 Year Extended Warranty including Accidental Damage, is instead be included in our One to One bundle as standard and without any extra cost to parents.

In addition to the included Warranty, parents are of course, free to make their own arrangements for device insurance, either through their home insurance or through any number of online device insurance providers.

Set Up and Configuration

Each and every device is set up through expert engineers, to ensure that it has everything that it needs to be used effectively by students, both in the classroom and at home. The Set Up and Configuration includes:

- Profiling and installation of restrictions and management policies, to ensure that each device is safe and secure for students. It should be remembered that this is an educational device only, and will not have access to any potential harmful or distracting Apps, like social media, games, etc.
- Disabling students ability to install Apps and removal of commercial Microsoft Store
- Disabling of Administrative Apps, e.g. PowerShell, Registry, etc.
- Full encryption of devices
- Disabling of USB Ports which assists in reducing the likelihood of any harmful data or malware, spyware, adware, viruses or damaging the device or compromising safety
- Blocking of all untrusted browser extensions
- Blocking of non-school accounts

- Requirement of Safe Search for browsing
- Enabling of automatic school Wi-Fi access (so that Wifi details never have to be disclosed to students)
- Blocking of Cortana (digital voice assistant)
- Blocking of Pop-Ups and override of security warnings
- Blocking of receiving advertisements over Bluetooth
- Auto scanning of all downloaded files via Windows Defender
- Auto-silence moving of Windows known folders to OneDrive
- Auto-silence user sign-in to OneDrive sync
- Power Saving Balance for maintenance of battery quality
- Installation of all required Book Publisher Apps and alignment of book accounts

Device Bundle Options

Bundle Option 1

- ASUS 12.2" Model with 128GB Storage, 8GB RAM and N150 Processor (this is a brand new processor from this year)
- Includes Garaged Pen as standard
- Includes Full 5 Year ASUS Warranty and Full 5 Year ASUS Accidental Damage Cover
 - Because this is a manufacturers Warranty and Accidental Damage Cover it means that even if a student were to leave Laurel Hill before the 5 Years were up, they're still fully covered for the 5 Year Warranty and 5 Year Accidental Damage Cover
 - There's no costs involved in returning / collecting the device. A courier collection is made from the school, without any cost
 - There's no kind of excess payable, i.e. parents don't have to pay anything towards a repair
 - The only real caveat is that the Accidental Damage Cover is limited to 5 breakages. There's no time conditions around those though, i.e. if a student broke it 5 times over 5 months, it's covered, or if it broke once a year for 5 years it's covered, etc.
- Includes Senso Classroom Management for each student for a full 3 Years with free training for teachers on using it covered also
- The bundle price covers everything, i.e., the Device, the Full Set Up and Configuration, the Extended Warranty, the 5 Year Accidental Damage Cover, the Onsite Deployment, ongoing Parent Support, and Senso Classroom Management
