STORIES FROM THE HEART

Our homes tell many stories.

The spaces we live in speak not only of how we live our lives, but also of why. Right now, many of us are experiencing a time of recalibration. We are slowing down, looking inwards, and reprioritising the things that mean most to us.

Master of Art

from the University of Iran,

I have taught in Iranian universities and conservatories for many years, and I have participated in various art exhibitions individually and in groups, and I perform my works on a large scale. I got acquainted with resin ten years ago and after that I used resin as the main material in my works. I know different materials and styles very well and I try to create new works by combining them.

And create beautiful deconstructions in my works. I also transform the resin into different, three-dimensional shapes or combine it with different fabrics. Also, taking the idea of jewelry, she has made a combination with aluminum, which is not similar to these works in the world
