

The Quick Connect
Solution Provider

Quick connect coupling solutions
for all media and applications.

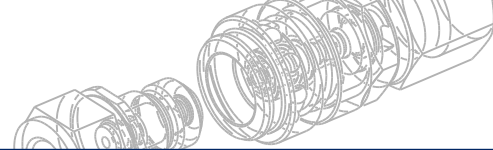

Filip Palmkvist, Underhållschef

CEJN has successfully manufactured quick connect couplings for air, hydraulic and fluid applications for more than 60 years.

In 1955, Carl Erik Josef Nyberg felt strongly enough about his innovative compressed air coupling that he started his own company to manufacture it.

Using his initials as the company's name, Carl launched operations for CEJN in Skövde, Sweden, where the international headquarters have remained.
