

# LANDSCAPING

We are a family grown business that offers a full-service landscape team, from new installations to complete renovations. Together, we will:

- Start with browsing plant varieties and recommended options.
- Consider pest control, soil conditions, and watering needs.
- Talk about native plants, landscape themes, and individual needs.
- Provide education so you can make decisions best for your landscape design.
- Create a simple design that is easy to implement.
- Help ensure successful plant growth for years to come.

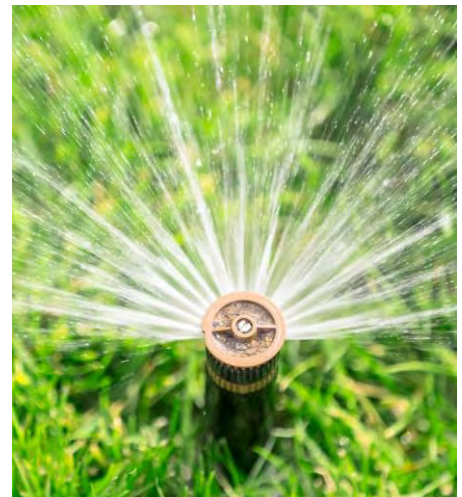

Our team works on new installations, flower bed renovation, tree installation, palm trees, and sod installation. We plant private estates and commercial properties and enjoy seeing our work throughout the community.

# IRRIGATION

Proper irrigation is key to a sustainable landscape design. When it comes to an effective irrigation plan, there is no one-size-fits-all system. Here's what we'll consider:

- Water pressure and volume readings from your home.
- Soil conditions unique to your property.
- The type of landscape that needs watering.
- The areas of the landscape that the water needs to reach.
- Then, we start designing a custom system unique to your needs.
- Lastly, you sit back and watch your beautiful landscape design flourish.

We use commercial-grade piping in our systems and stand behind our product. Systems should be checked and cleaned two to three times a year, a service we provide. Otherwise, it's pretty hands-off and automated for our customers. We provide customer support for the lifetime of our systems and look forward to serving your needs.
