Incredible views await you in this contemporary ranch home, sitting on 5 acres of land! A comfortable living room, with gas insert fire-place, cathedral ceilings and plush carpeting presents itself when you walk through the front door. The kitchen provides plenty of room to entertain in, with a bi-level bar/prep island dressed in black granite, Thermador gas cooktop and double oven and dishwasher, all stainless. Pantry, tile backsplash, wood floors and oak cabinets also dress this kitchen up. The dining room shares similar views to the west. Off the living room is a study with French doors and westward view. The master bedroom is spacious with his/hers walk-in closets and a 5 piece ensuite with walk in glass block shower and jetted tub. The remaining bedrooms share a full size bath and would work out as children's or guest rooms. Down the stairs, a large family room with fire-place and dining allow for added comfort. Only steps away is a large office/game room. Very scenic.
