4. Does it make sense?

A large tree with green leaves and brown acorns is on the right side of the page. A grey squirrel is climbing the trunk of the tree. The background is a light blue sky. The ground is brown with some green grass and a small sprout.

Seeds Become Trees

Squirrels love to eat the seeds from trees. They collect these seeds all summer to eat in winter. They hide some seeds in hollow trees. They bury some seeds in the ground. When spring comes, the buried seeds sprout. These sprouts become new trees.

# The Little Turtle

by Vachel Lindsay

There was a little turtle.  
He lived in a box.  
He swam in a puddle.  
He climbed on the rocks.

He snapped at a mosquito.  
He snapped at a flea.  
He snapped at a minnow.  
And he snapped at me.

He caught the mosquito.  
He caught the flea.  
He caught the minnow.  
But he didn't catch me.
