

Investors Exchange Product Information Circular 2017 – 0152

Date: November 15, 2017

Re: J.P. Morgan Exchange-Traded Fund Trust

This Information Circular is being issued to advise you that the following securities have been approved for trading pursuant to unlisted trading privileges (“UTP”) on the Investors Exchange (“IEX” or the “Exchange”) as UTP Derivative Securities pursuant to IEX Rule 16.160. Compliance and supervisory personnel should note that, among other things, this Information Circular discusses the need to deliver a prospectus to customers purchasing shares of the exchange-traded funds. Please forward this Information Circular to interested persons within your organization.

<u>Exchange-Traded Fund</u>	<u>Symbol</u>
JP Morgan U.S. Dividend ETF	JDIV
JP Morgan U.S. Minimum Volatility ETF	JMIN
JP Morgan U.S. Momentum Factor ETF	JMOM
JP Morgan U.S. Quality Factor ETF	JQUA
JP Morgan U.S. Value Factor ETF	JVAL

Issuer/Trust: J.P. Morgan Exchange-Traded Fund Trust

Issuer/Trust Website: www.jpmorganfunds.com

Primary Listing Exchange: NYSE Arca

The purpose of this information circular is to outline various rules and policies that will be applicable to trading in these new products pursuant to the Exchange’s unlisted trading privileges, as well as to provide certain characteristics and features of the products. For a more complete description of the Issuer, the securities and the underlying market instruments or indexes, visit the Issuer Website, consult the Prospectus available on the Issuer Website or examine the Issuer Registration Statement or review the most current information bulletin issued by the Primary Listing Exchange.

Background Information on the Fund

The J.P. Morgan Exchange-Traded Fund Trust (the “Trust”) is a management investment company registered under the Investment Company Act of 1940, as amended (the “1940 Act”), consisting of several investment portfolios. This circular relates only to the Funds listed above (each, a “Fund” and together, the “Funds”). The shares of the Fund are referred to herein as “Shares.” JPMIM (the “Adviser”) is the investment adviser to the Funds.

JPMorgan U.S. Dividend ETF

The JPMorgan U.S. Dividend ETF (JDIV) seeks investment results that closely correspond, before fees and expenses, to the performance of the JP Morgan US Dividend Index (the “Underlying Index”). The Fund will invest at least 80% of its Assets in securities included in the Underlying Index. “Assets” means net assets, plus the amount of borrowing for investment purposes. The Underlying Index is comprised of

higher yielding U.S. equity securities. The Adviser is a sponsor of the Underlying Index and developed the proprietary factors on which the Underlying Index is based. FTSE International Limited, the Benchmark Administrator, administers, calculates and governs the Underlying Index.

Holdings in the Underlying Index are selected primarily from the constituents of the Russell 1000 Index, a larger Russell Index, which is comprised of large- and mid-cap equity securities of companies located in the United States. Based on its rules-based selection process, the Underlying Index is designed to provide exposure to the highest dividend yielding sectors on a risk adjusted basis, meaning that the index will establish sector weights by considering both the yield of the sector and the relative volatility of sector returns. As a result, certain sectors may be overweighted within the Underlying Index because they include higher dividend yielding companies.

The Underlying Index and the Fund are diversified across the following sectors: financials, technology, consumer services, health care, industrials, consumer goods, energy, materials, telecommunication and utilities. The Underlying Index will identify U.S. equity securities within each sector that have a high dividend yield over a rolling twelve month period. Within each sector, individual equity securities are also weighted to diversify risk. The Fund's securities are large- and mid-cap equity securities of U.S. companies, including common stock, preferred stock and real estate investment trusts (REITs). As of October 16, 2017, there were 211 companies represented in the Underlying Index and the market capitalizations of those companies ranged from \$1.55 billion to \$581.60 billion. The number of components and the market capitalizations of the companies are subject to change over time.

JPMorgan U.S. Minimum Volatility ETF

The JPMorgan U.S. Minimum Volatility ETF (JMIN) seeks investment results that closely correspond, before fees and expenses, to the performance of the JP Morgan US Minimum Volatility Index (the "Volatility Index"). The Fund will invest at least 80% of its Assets in securities included in the Volatility Index. "Assets" means net assets, plus the amount of borrowing for investment purposes. The Volatility Index measures the performance of U.S. equity securities selected using a rules-based process that is designed so the Volatility Index targets lower volatility than the Russell 1000 Index.

The Adviser is a sponsor of the Volatility Index and developed the proprietary factors on which the Volatility Index is based. FTSE International Limited, the Benchmark Administrator, administers, calculates and governs the Volatility Index. Holdings in the Volatility Index are selected primarily from the constituents of the Russell 1000 Index, a larger Russell Index, which is comprised of large- and mid-cap equity securities of companies located in the United States. The Volatility Index is designed to distribute risk among sectors and stocks in order to seek to minimize the overall portfolio volatility based upon the parameters of the rules-based process. Specifically, sector weightings in the Volatility Index are adjusted based on their historical volatility and correlation of the returns among sectors over the last three years. Based on the riskiness and correlations of the sector returns, the optimization process aims to determine the optimal sector allocation to minimize the volatility in the Volatility Index subject to sector constraints to ensure diversification. These constraints limit the target sector weights at each rebalance to a minimum of 5% and a maximum of 20% in the Volatility Index. As a result of this process, there will be higher allocations within the Volatility Index to those sectors with lower historical volatility or those sectors that are expected to lower portfolio risk. The process also seeks to avoid overconcentration to any sector. The Volatility Index is diversified across the following sectors: financials, technology, consumer services, health care, industrials, consumer goods, energy, materials, tele communication and utilities. Within each sector, stocks are selected and weighted to both reduce portfolio volatility and to avoid large weightings in single securities. The Fund's securities are large- and mid-cap equity securities of U.S. companies, including common stock, preferred stock and real estate investment trusts (REITs). As of October 16, 2017, there were 212 companies represented in the Volatility Index and the market capitalizations of those companies ranged from \$507.39 million to \$581.60 billion. The number of components and the market capitalizations of the companies are subject to change over time.

JPMorgan U.S. Momentum Factor ETF

The JPMorgan U.S. Momentum Factor ETF (JMOM) seeks investment results that closely correspond, before fees and expenses, to the performance of the JP Morgan US Momentum Factor Index (the “Momentum Index”). The Fund will invest at least 80% of its Assets in securities included in the Momentum Index. “Assets” means net assets, plus the amount of borrowing for investment purposes. The Momentum Index is comprised of U.S. equity securities selected to represent positive momentum factor characteristics. The Adviser is a sponsor of the Momentum Index and developed the proprietary factors on which the Momentum Index is based. FTSE International Limited, the Benchmark Administrator, administers, calculates and governs the Momentum Index. Holdings in the Momentum Index are selected primarily from the constituents of the Russell 1000 Index, a larger Russell Index, which is comprised of large- and mid-cap equity securities of companies located in the United States. The rules-based proprietary selection process utilizes a momentum factor to identify companies that have had better recent performance compared to other securities. The Momentum Index is diversified across the following sectors on a market capitalization weighted basis: financials, technology, consumer services, health care, industrials, consumer goods, energy, materials, telecommunication and utilities. Within each sector, individual equity securities are also weighted to ensure diversification. The Fund’s securities are large- and mid-cap equity securities of U.S. companies, including common stock, preferred stock and real estate investment trusts (REITs). As of October 16, 2017, there were 288 companies represented in the Momentum Index and the market capitalizations of those companies ranged from \$1.32 billion to \$832.99 billion. The number of components and the market capitalizations of the companies are subject to change over time.

JPMorgan U.S. Quality Factor ETF

The JPMorgan U.S. Quality Factor ETF (JQAL) seeks investment results that closely correspond, before fees and expenses, to the performance of the JP Morgan US Quality Factor Index (the “Quality Index”). The Fund will invest at least 80% of its Assets in securities included in the Quality Index. “Assets” means net assets, plus the amount of borrowing for investment purposes. The Quality Index is comprised of U.S. equity securities selected to represent quality factor characteristics. The Adviser is a sponsor of the Quality Index and developed the proprietary factors on which the Quality Index is based. FTSE International Limited, the Benchmark Administrator, administers, calculates and governs the Quality Index. Holdings in the Quality Index are selected primarily from the constituents of the Russell 1000 Index, a larger Russell Index, which is comprised of large- and mid-cap equity securities of companies located in the United States. The rules-based proprietary selection process utilizes a quality factor to identify higher quality companies as measured by profitability, quality of earnings, and solvency. The Quality Index is diversified across the following sectors on a market capitalization weighted basis: financials, technology, consumer services, health care, industrials, consumer goods, energy, materials, telecommunication and utilities. Within each sector, individual equity securities are also weighted to ensure diversification. The Fund’s securities are large- and mid-cap equity securities of U.S. companies, including common stock, preferred stock and real estate investment trusts (REITs). As of October 16, 2017, there were 242 companies represented in the Quality Index and the market capitalizations of those companies ranged from \$1.32 billion to \$832.99 billion. The number of components and the market capitalizations of the companies are subject to change over time.

JPMorgan U.S. Value Factor ETF

The JPMorgan U.S. Value Factor ETF (JVAL) seeks investment results that closely correspond, before fees and expenses, to the performance of the JP Morgan US Value Factor Index (the “Value Index”). The Fund will invest at least 80% of its Assets in securities included in the Value Index. “Assets” means net assets, plus the amount of borrowing for investment purposes. The Value Index is

comprised of U.S. equity securities selected to represent value factor characteristics. The Adviser is a sponsor of the Value Index and developed the proprietary factors on which the Value Index is based. FTSE International Limited, the Benchmark Administrator, administers, calculates and governs the Value Index. Holdings in the Value Index are selected primarily from the constituents of the Russell 1000 Index, a larger Russell Index, which is comprised of large- and mid-cap equity securities of companies located in the United States. The rules-based proprietary selection process utilizes a relative valuation factor to identify companies with attractive valuations. The Value Index is not currently focused on any particular sector and is diversified across the following sectors on a market capitalization weighted basis: financials, technology, consumer services, health care, industrials, consumer goods, energy, materials, telecommunication and utilities. Within each sector, individual equity securities are also weighted to ensure diversification. The Fund's securities are large- and mid- cap equity securities of U.S. companies, including common stock, preferred stock and real estate investment trusts (REITs). As of October 16, 2017, there were 277 companies represented in the Value Index and the market capitalizations of those companies ranged from \$1.53 billion to \$832.99 billion. The number of components and the market capitalizations of the companies are subject to change over time.

For more information regarding each Fund's investment strategy, please read the prospectus for the Funds.

As described more fully in the Trust's prospectus and Statement of Additional Information ("SAI"), the Funds issue and redeem Shares at net asset value ("NAV") only in large blocks of 50,000 Shares (each block of Shares called a "Creation Unit"). As a practical matter, only broker-dealers or large institutional investors with creation and redemption agreements (called Authorized Participants) can purchase or redeem these Creation Units. Except when aggregated in Creation Units, the Shares may not be redeemed with the Funds.

Shares are held in book-entry form, which means that no Share certificates are issued. The Depository Trust Company or its nominee is the record owner of all outstanding Shares of the Funds and is recognized as the owner of all Shares for all purposes.

The NAV per Share for each Fund is computed by dividing the value of the net assets of the Fund (i.e., the value of its total assets less total liabilities) by the total number of Shares outstanding. Expenses and fees are accrued daily and taken into account for purposes of determining NAV. The NAV of each Fund is determined each business day after the close of trading (ordinarily 4:00 p.m., Eastern Time or "ET") of the New York Stock Exchange. Any assets or liabilities denominated in currencies other than the U.S. dollar are converted into U.S. dollars at the current market rates on the date of valuation as quoted by one or more sources.

The registration statement for the Funds describes the various fees and expenses for the Funds' Shares. For a more complete description of the Funds and the underlying indexes, visit the Funds' website at www.jpmorganfunds.com.

Purchases and Redemptions in Creation Unit Size

IEX Members are hereby informed that procedures for purchases and redemptions of Shares in Creation Units are described in the Trust's Prospectus and SAI and that Shares are not individually redeemable but are redeemable only in Creation Unit aggregations or multiples thereof.

Principal Risks

Interested persons are referred to the Fund's Prospectus for a description of risks associated with an investment in the Fund. These risks include, but are not limited to, sovereign and quasi-sovereign bond

risk, credit risk, interest rate risk, high yield securities risk, risk of investing in emerging market issuers, risk of investing in foreign securities, restricted securities risk, market risk, sampling risk, index tracking risk, risk of cash transactions, authorized participant concentration risk, ETF shares trading and premium/discount risk, non-diversified risk, and concentration risk. In addition, the market prices of the Shares will fluctuate in accordance with changes in NAV as well as the supply and demand for the Shares. As a result, the Shares may trade at market prices that may differ from their NAV. The NAV of the Shares will fluctuate with changes in the market value of the Fund's holdings.

Exchange Rules Applicable to Trading in the Shares

Trading in the Shares on IEX is subject to IEX trading rules.

Trading Hours

The value of the Index underlying the Shares will be disseminated to data vendors every 15 seconds during the Regular Trading Session.

The Shares will trade on IEX between 8:00 a.m. and 5:00 p.m. Please note that trading in the Shares during the Exchange's Pre-Market and Post-Market Sessions ("Extended Market Sessions") may result in additional trading risks which include: (1) that the current underlying indicative value may not be updated during the Extended Market Sessions, (2) lower liquidity in the Extended Market Sessions may impact pricing, (3) higher volatility in the Extended Market Sessions may impact pricing, (4) wider spreads may occur in the Extended Markets Sessions, and (5) because the indicative value is not calculated or widely disseminated during the Extended Market Sessions, an investor who is unable to calculate an implied value for the Shares in those sessions may be at a disadvantage to market professionals.

Dissemination of Data

The Consolidated Tape Association will disseminate real time trade and quote information for the Funds to Tape B.

Delivery of a Prospectus

Exchange Members should be mindful of applicable prospectus delivery requirements under the federal securities laws with respect to transactions in the Fund. Prospectuses may be obtained through the Fund's

website. The Prospectus for the Fund does not contain all of the information set forth in the Funds Registration Statement (including the exhibits to the Registration Statement), parts of which have been omitted in accordance with the rules and regulations of the SEC. For further information about the Fund, please refer to its Registration Statement.

In the event that the Fund relies upon an order by the SEC exempting the Shares from certain prospectus delivery requirements under Section 24(d) of the 1940 Act and in the future make available a written product description, Exchange Rules require that Exchange Members provide to all purchasers of Shares a written description of the terms and characteristics of such securities, in a form prepared by the Issuer of the Fund, no later than the time a confirmation of the first transaction in the Shares is delivered to such purchaser. In addition, Exchange Members shall include such a written description with any sales material relating to the Shares that is provided to customers or the public. Any other written materials provided by an IEX member to customers or the public making specific reference to the Shares as an investment vehicle must include a statement in substantially the following form: "A circular describing the terms and characteristics of [the UTP Derivative Securities] has been prepared by the [open-ended management investment company name] and is available from your broker. It is recommended that you obtain and review such circular before purchasing [the UTP Derivative Securities]."

An Exchange member carrying an omnibus account for a non-member broker-dealer is required to inform such non-member that execution of an order to purchase Shares for such omnibus account will be deemed to constitute agreement by the non-member to make such written description available to its customers on the same terms as are directly applicable to such Exchange member under this rule.

Upon request of a customer, Exchange Members also shall provide a copy of the Prospectus.

Suitability

Trading in the securities on the Exchange will be subject to the provisions of IEX Rule 3.170 and other applicable suitability rules. Members recommending transactions in the securities to customers should make a determination that the recommendation is suitable for the customer.

Trading Halts

The Exchange will halt trading in the Shares of a security in accordance with the Exchange's Rules. The grounds for a halt include a halt because the intraday indicative value of the security and/or the value of its underlying index are not being disseminated as required, a halt for other regulatory reasons or due to other conditions or circumstances deemed to be detrimental to the maintenance of a free and orderly market.

Exemptive, Interpretive and No-Action Relief Under Federal Securities Regulations

The Securities and Exchange Commission (the "SEC") has issued letters granting exemptive, interpretive and no-action relief from certain provisions of rules under the Securities Exchange Act of 1934 for exchange-traded securities listed and traded on a registered national securities exchange that meet certain criteria.

AS WHAT FOLLOWS IS ONLY A SUMMARY OF THE RELIEF OUTLINED IN THE NO-ACTION LETTERS REFERENCED ABOVE, THE EXCHANGE ADVISES INTERESTED PARTIES TO CONSULT THE NO-ACTION LETTERS FOR MORE COMPLETE INFORMATION REGARDING THE MATTERS COVERED THEREIN AND THE APPLICABILITY OF THE RELIEF GRANTED IN RESPECT OF TRADING IN SECURITIES. INTERESTED PARTIES SHOULD ALSO CONSULT THEIR PROFESSIONAL ADVISORS.

Regulation M Exemptions

Generally, Rules 101 and 102 of Regulation M prohibit any “distribution participant” and its “affiliated purchasers” from bidding for, purchasing, or attempting to induce any person to bid for or purchase any security which is the subject of a distribution until after the applicable restricted period, except as specifically permitted in Regulation M. The provisions of the Rules apply to underwriters, prospective underwriters, brokers, dealers, and other persons who have agreed to participate or are participating in a distribution of securities.

The SEC has granted an exemption from Rule 101 under Regulation M to permit persons participating in a distribution of Shares of the above-mentioned Fund to engage in secondary market transactions in such Shares during their participation in such a distribution. In addition, the SEC has granted relief under Regulation M to permit persons who may be deemed to be participating in the distribution of Shares of the above-mentioned Fund (i) to purchase securities for the purpose of purchasing Creation Unit Aggregations of Fund Shares and (ii) to tender securities for redemption in Creation Unit Aggregations. Further, the SEC has clarified that the tender of Fund Shares to the Fund for redemption does not constitute a bid for or purchase of any of the Funds’ securities during the restricted period of Rule 101. The SEC has also granted an exemption pursuant to paragraph (e) of Rule 102 under Regulation M to allow the redemption of Fund Shares in Creation Unit Aggregations during the continuous offering of Shares.

Rule 10b-10 (Customer Confirmations for Creation or Redemption of Fund Shares)

Broker-dealers who handle purchases or redemptions of Fund Shares in Creation Unit size for customers will be permitted to provide such customers with a statement of the number of Creation Unit Aggregations created or redeemed without providing a statement of the identity, number and price of Shares of the individual securities tendered to the Fund for purposes of purchasing Creation Unit Aggregations (“Deposit Securities”) or the identity, number and price of Shares to be delivered by the Trust for the Fund to the redeeming holder (“Redemption Securities”). The composition of the securities required to be tendered to the Fund for creation purposes and of the securities to be delivered on redemption will be disseminated each business day and will be applicable to requests for creations or redemption, as the case may be, on that day. This exemptive relief under Rule 10b-10 with respect to creations and redemption is subject to the following conditions:

- 1) Confirmations to customers engaging in creations or redemptions must state that all information required by Rule 10b-10 will be provided upon request;
- 2) Any such request by a customer for information required by Rule 10b-10 will be filed in a timely manner, in accordance with Rule 10b-10(c); and
- 3) Except for the identity, number, and price of Shares of the component securities of the Deposit Securities and Redemption Securities, as described above, confirmations to customers must disclose all other information required by Rule 10b-10(a).

Section 11(d)(1): Rules 11d1-1 and 11d1-2

Section 11(d)(1) of the Act generally prohibits a person who is both a broker and a dealer from effecting any transaction in which the broker-dealer extends credit to a customer on any security which was part of a new issue in the distribution of which he participated as a member of a selling syndicate or group within thirty days prior to such transaction. The SEC has clarified that Section 11(d)(1) does not apply to broker-dealers that are not Authorized Participants (and, therefore, do not create Creation Unit Aggregations) that engage in both proprietary and customer transactions in Shares of a Fund in the secondary market, and for broker-dealer Authorized Participants that engage in creations of Creation Unit Aggregations. This relief is subject to specific conditions, including the condition that such broker-dealer (whether or not an Authorized Participant) does not, directly or indirectly, receive from the Fund complex any payment, compensation or other economic incentive to promote or sell the Shares of a Fund to persons outside the fund complex, other than non-cash compensation permitted under NASD Rule 2830(l)(5)(A), (B) or (C). (See letter from Catherine McGuire, Chief Counsel, SEC Division of Market Regulation, to Securities Industry Association, Derivative Products Committee, dated November 21, 2005.)

The SEC also has taken a no-action position under Section 11(d)(1) of the Act that broker-dealers may treat Shares of a Fund, for purposes of Rule 11d1-2, as "securities issued by a registered open-end investment company as defined in the Investment Company Act" and thereby extend credit or maintain or arrange for the extension or maintenance of credit on Shares that have been owned by the persons to whom credit is provided for more than 30 days, in reliance on the exemption contained in the rule.

Rule 14e-5

An exemption from Rule 14e-5 has been granted to permit any person acting as a dealer-manager of a tender offer for a component security of the Fund (1) to redeem Fund Shares in Creation Unit Aggregations from the issuer that may include a security subject to such tender offer and (2) to purchase Fund Shares during such tender offer. In addition, a no-action position has been taken under Rule 14e-5 if a broker-dealer acting as a dealer-manager of a tender offer for a security of the Fund purchases or arranges to purchase such securities in the secondary market for the purpose of tendering such securities to purchase one or more Creation Unit Aggregations of Shares, if made in conformance with the following:

- 1) such bids or purchases are effected in the ordinary course of business, in connection with a basket of 20 or more securities in which any security that is the subject of a distribution, or any reference security, does not comprise more than 5% of the value of the basket purchase; or
- 2) purchases are effected as adjustments to such basket in the ordinary course of business as a result of a change in the composition of the underlying index; and
- 3) such bids or purchases are not effected for the purpose of facilitating such tender offer.

SEC Rule 15c1-5 and 15c1-6

The SEC has taken a no-action position with respect to Rule 15c1-5 and Rule 15c1-6 as to the required disclosure of control by a broker or dealer with respect to creations and redemptions of Fund Shares and secondary market transactions therein. (See letter from Catherine McGuire, Chief Counsel, SEC Division of Market Regulation, to Securities Industry Association, Derivative Products Committee, dated November 21, 2005.)

This Information Circular is not a statutory prospectus. Members should consult the Prospectus for a security and the security's website for relevant information.
