**Investment Risks**

Accordingly, the Notes should be purchased only by knowledgeable investors who understand the terms of the investment and are familiar with the behavior of the underlying index and financial markets generally. The Notes are riskier than ordinary unsecured debt securities.

Risks associated with an investment in the Notes may include, but are not limited to, issuer creditworthiness; loss of all or a substantial portion of an investment in the Notes; no guaranteed minimum payment at maturity or call, or upon acceleration or early redemption, no payment of interest or any coupon amount; risks associated with the applicable index or reference asset; acceleration and redemption, resulting in a loss of all or a substantial portion of an investment; and restriction on the minimum number of Notes that may be redeemed and on the procedures and timing for early redemption.
