IIFL Home Finance Ltd. (IIFL HFL) in collaboration with Asian Development Bank (ADB), launches 1st event from the flagship Kutumb series 1/6/2022

<https://www.adsdesi.com/IIFL-Home-Finance-Ltd---IIFL-HFL--in-collaboration-with-Asian-Development-Bank--ADB---launches-1st-event-from-the-flagship-Kutumb-series-8880>

Chennai: 6 th January 2022: IIFL Home Finance Ltd. (IIFL HFL), in collaboration with Asian Development Bank (ADB), organised its flagship event

Kutumb which is an initiative to promote Green Affordable Housing in India. The event took place at India Habitat Centre, New Delhi on December 14 th , 2021 with the presence of Mr. S.K. Hota (MD, National Housing Bank) & Mr. Nirmal Jain (Founder & Chairman, IIFL Group) as chief guests. The event also had speakers from development finance institutions (DFIs) such as Asian Development Bank and Proparco (an arm of Agence Franaise de Dveloppement Group (AFD Group).

Under the project 'Resilient & Green Affordable Housing for Economically Weaker Section (EWS) and Low-Income Group (LIG) categories in India', IIFLHFL, with the support of ADB, will be hosting series of it's flagship event Kutumb' at various locations across the country. The objective of Kutumb is to enable and support the green building ecosystem in the affordable housing sector in India. Kutumb, Delhi Chapter, titled 'Climate Resilient & Green Affordable Housing in India' focussed on affordable, low-carbon and resilient homes. The programme witnessed over 120 attendees, a mix of housing developers, financiers, subject matter experts and consultants.

Mr. Monu Ratra (ED and CEO, IIFLHFL) said, "The pandemic has brought in high consciousness towards green and sustainable construction amongst the developers, as well as the homebuyers. Also, considering buildings contribute around 35% of carbon emissions and with the vast majority of housing stock yet to be built in India, it is imperative to hold platforms such as Kutumb to build an ecosystem to foster green, sustainable and affordable housing in India.

Sharing her views, Ms. Susan Olsen, Senior Investment Specialist for South Asia, ADB said, Building climate-resilient and sustainable communities begins by giving access to affordable and green homes, particularly for lower income groups that are highly vulnerable to climate change impacts. IIFL HFL is our partner in broadening the scope of green affordable housing in India.

The event witnessed discussions and deliberations between industry experts such as Priya Sunder (Senior Investment Officer, Asian Development Bank), Diane Jegam (Directrice Rgionale PROPARCO Asie du Sud chez Proparco), nationally renowned architect Ashok B Lall (Principal Architect, Ashok B. Lall Architects), Mohua Mukherjee (Economist & Green Finance Professional, Independent Director, IIFL Home Finance Ltd.), Dr. Sejal Patel (Professor & Chair, Faculty of Planning, CEPT), Ravi Aggarwal (Co-founder & MD, Signature Global Group of Companies), and Saswat Bandyopadhyay (Project Director, CEPT). The event was conducted in a panel discussion format supported by presentations. The panels focused on subjects 'Sustainable Finance in Affordable Housing' and 'Importance of Climate Resilience in Affordable Housing' in India.

In the series of Kutumb, the next event is likely to be scheduled in Ahmedabad, in the first week of February, where IIFLHFL and ADB aim to bring together the affordable housing developers, planners, architects, consultants and potential homebuyers on one forum and address subjects relevant to green affordable housing in the area.

The programme witnessed over 120 attendees, a mix of housing developers, financiers, subject matter experts and consultants.

Mr. Monu Ratra (ED and CEO, IIFLHFL) said, The pandemic has brought in high consciousness towards green and sustainable construction amongst the developers, as well as the homebuyers. Also, considering buildings contribute around 35% of carbon emissions and with the vast majority of housing stock yet to be built in India, it is imperative to hold platforms such as Kutumb to build an ecosystem to foster green, sustainable and affordable housing in India.

Sharing her views, Ms. Susan Olsen, Senior Investment Specialist for South Asia, ADB said, Building climate-resilient and sustainable communities begins by giving access to affordable and green homes, particularly for lower income groups that are highly vulnerable to climate change impacts. IIFL HFL is our partner in broadening the scope of green affordable housing in India.

The event witnessed discussions and deliberations between industry experts such as Priya Sunder (Senior Investment Officer, Asian Development Bank), Diane Jegam (Directrice Rgionale PROPARCO Asie du Sud chez Proparco), nationally renowned architect Ashok B Lall (Principal Architect, Ashok B. Lall Architects), Mohua Mukherjee (Economist & Green Finance Professional, Independent Director, IIFL Home Finance Ltd.), Dr. Sejal Patel (Professor & Chair, Faculty of Planning, CEPT), Ravi Aggarwal (Co-founder & MD, Signature Global Group of Companies), and Saswat Bandyopadhyay (Project Director, CEPT). The event was conducted in a panel discussion format supported by presentations. The panels focused on subjects 'Sustainable Finance in Affordable Housing' and 'Importance of Climate Resilience in Affordable Housing' in India.

In the series of Kutumb, the next event is likely to be scheduled in Ahmedabad, in the first week of February, where IIFLHFL and ADB aim to bring together the affordable housing developers, planners, architects, consultants and potential homebuyers on one forum and address subjects relevant to green affordable housing in the area.

About IIFL Home Finance Limited:

Incorporated in 2006 and registered in 2009 with the National Housing Bank (NHB), IIFL Home Finance Limited is a wholly-owned subsidiary of IIFL Finance Limited. The Company is one of Indias leading housing finance companies and is a preferred choice for affordable home loan requirements. Through our affordable home loans, IIFL Home Finance makes peoples aspirations of owning a home a reality. As a technology-driven housing finance player, we endeavour to make our customer experience as seamless as possible. We have made the entire life cycle of our housing loans i.e., from origination to closure, completely digitized. We have managed this through our state-of-the-art IT infrastructure which has helped in reducing costs, enabled real-time analysis of customer data, and improved our control and underwriting functions, while increasing customer reach and distribution capability.

We operate a financially inclusive customer-centric lending business and strive to ensure that our business model

purchase of homes to a customer segment that is not serviced by the mainstream financial services sector and our employment of personnel in rural and semi-urban locations across India, we are fulfilling an important social objective of economic upliftment for these segments of the Indian economy.

We offer our customers a range of mortgage-related loan products, these include (i) housing loans, for purchase of ready built residential units, under-construction property by approved builders, self-construction, home improvement on pre-owned property, and purchase of land for construction of residential property; (ii) secured business loans, for primarily meeting working capital requirement, business use and purchase of commercial property; and (iii) affordable housing project loans, to meet construction expenses of affordable housing projects of reputed developers.
