CHECKLIST 2 PRE SWIM CHECKS

Special notes as per Official Rules:

- 1.1 No physical contact with the swimmer is allowed.
- 1.2 The use of MP3 players or other electrical audio / communication devices is not permitted.
- 1.3 Swimmers provide their own Support Crew (minimum of 1 who also must be fluent in English for safety purposes), who are responsible for your wellbeing, but may not interfere with the decisions of the Pilots or Observers. One additional vessel (kayak, canoe or other) is permitted under the supervision of the pilot.
- 1.4 Starting Position: Swimmers must enter the water from the shore, or from the Pilot boat and swim to beach or rocks with no running sea water behind and start from there. Under health and safety reasons the pilot may direct swimmer to start from a standing position with the water level more than waist height. This must be agreed with the observer prior to the start the swim or it may not be ratified.
- 1.5 Finishing: Swimmers must finish on dry land or by touching cliffs with no sea water behind.
- 1.6 Turning on two way swims: land as per 4.4 and 4.5 above. You should immediately return to the water, where you may stand or sit for 10 minutes. You may not be touched by any person, but can have grease, food, medical supplies or swim apparel handed to you. This stop time is added to your overall time.
- 1.7 Support swimmers. Solo swimmers may have support swimmers after the first period of 3 hours has elapsed and for a period of 1 hour. The support swimmer may not re-enter the water until a period of two hours has elapsed. The support swimmer may swim alongside, not in front of, the swimmer. The Pilot may request, at their discretion, the support swimmer to join the swimmer outside these times for health and safety reasons, e.g. major cramp. Relay swimmers are not permitted to have support swimmers or pace makers.
- 1.8 Relay swimmers (minimum 2) must swim for at least 1 hour each, in the same order each time. At change over, swimmers shall enter the water from behind the current swimmer and swim past. The swimmer in the water shall exit as soon as possible, with change over taking no more than 5 minutes. The rota (order of swimmers, length of each swim) for the relay team members must be agreed in advance with the ILDSA Observer.
- 1.9 Any adaptations to these rules required for swimmers with additional needs, must be agreed in advance the ILDSA. If there are any special circumstances as ILDSA observer you will be advised of this pre swim by the ILDSA North Channel Secretary.

ALWAYS REFER TO NORTH CHANNEL RULES FOR FULL GUIDANCE

IF YOU HAVE ANY QUERIES OR CONCERNS / QUESTIONS DURING A SWIM AND NEED CONFIRMATION PLEASE CONTACT THE NORTH CHANNEL SECRETARY

CHECKLIST 4 ACCOUNT OF THE SWIM

BEAUFORT SCALE					
Beaufort Number	Name	Knots	MPH	Effects Observed Far From Land	Effects Observed On Land
0	Calm	Under 1	Under 1	Sea like mirror.	Calm; smoke rises vertically.
1	Light Air	1-3	1-3	Ripples with appearances of scales; no foam crests.	Direction of wind shown by smoke drift, but not by wind vanes.
2	Light Breeze	4-6	4-7	Small wavelets; crests of glassy appearance, not breaking.	Wind felt on face; leaves rustle; ordinary vane moved by wind.
3	Gentle Breeze	7-10	8-12	Large wavelets; crests begin to break; scattered whitecaps.	Leaves and small twigs in constant motion; wind extends light flag.
4	Moderate Breeze	11-16	13-18	Small waves, becoming longer; numerous whitecaps.	Raises dust and loose paper, small branches are moved.
5	Fresh Breeze	17-21	19-24	Moderate waves, taking longer form; many whitecaps; some spray.	Small trees in leaf begin to sway; crested wavelets form on inland waters.
6	Strong Breeze	22-27	25-31	Larger waves forming; whitecaps everywhere; more spray.	Large branches in motion; whistling heard in telegraph wires; umbrellas used with difficulty.
7	Near Gale	28-33	32-38	Sea heaps up; white foam from breaking waves begins to be blown in streaks.	Whole trees in motion; inconvenience felt in walking against the wind.
8	Gale	34-40	39-46	Moderately high waves of greater length; edges of crests begin to break into spindrift; foam is blown in well-marked streaks.	Breaks twigs off trees; generally impedes progress.
9	Strong Gale	41-47	47-54	High waves; sea begins to roll; dense streaks of foam; spray may reduce visibility.	Slight structural damage occurs (chimney pots and slate removed).
10	Storm	48-55	55-63	Very high waves with overhanging crests; sea takes white appearance as foam is blown in very dense streaks; rolling is heavy and visibility reduced.	Seldom experienced inland; trees uprooted; considerable structural damage occurs.
11	Violent Storm	56-63	64-72	Exceptionally high waves; sea covered with white foam patches; visibility still more reduced.	Very rarely experienced; accompanied by widespread damage.
12	Hurricane	64 and over	73 and over	Air filled with foam; sea completely white with driving spray; visibility reduced.
