Concept

Structure: The restaurant is built from repurposed shipping containers, giving it an industrial yet modern aesthetic.

Drive-Thru: A dedicated drive-thru lane wraps around the building, with a menu board, ordering and collection windows.

Walk up counter: A front facing walk up service window and a small outdoor seating area for customers who prefer to order on foot. Including a hand washing station outside for customers.

Kitchen and Storage: The back section of the container houses the kitchen, cold storage and prep area.

Roof feature: A flat roof with a slight overhang provides shade and protection for customers and staff with an extended roof for outdoor seating.

Exterior Design:

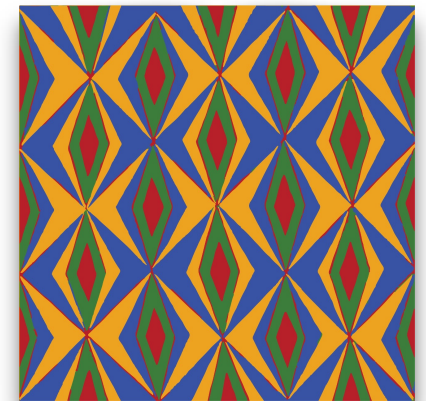

Colour scheme: The containers are painted with the chosen colour scheme colours, with bold accent pattern designs, black window and door frames, and bold large signage for a striking, high visibility appearance.

Branding: Large illuminated signage on the front and sides, with a stylized logo matching the colour scheme.

Lighting: Indoor Track Lighting as well as outdoor solar lights to highlight the vibrant colors at night.

Decor: Minimalist design with decorative elements and a menu board featuring digital or backlit displays.

Colour Scheme

Order & Collection Windows
