NEXT-GENERATION ANTIVIRUS_

Stop Tomorrow's Threats Today

KEY BENEFITS

» Eliminate ransomware with behavior and deception techniques

» Prevent fileless and in-memory attacks

» Block exploits

» Mitigate risks from USB devices

» Extend firewall control to endpoint

» Consolidate endpoint agents into one

» Mitigate gaps left by legacy AV

» Gain full attack visibility across all endpoints

ABOUT CYBEREASON

The Cybereason Defense Platform combines managed endpoint prevention, detection, and response in one lightweight agent. It delivers multi-layer endpoint prevention by leveraging signature and signatureless techniques to prevent known and unknown threats in conjunction with behavioral and deception techniques to prevent ransomware and fileless attacks. Combine the best platform on the market with managed services from our expert security team to receive a comprehensive defense.

With new, sophisticated attacks emerging at a rapid pace, legacy AV is no longer enough to protect your organization. Most tools focus on previously known attack patterns, leveraging known Indicators of Compromise and existing threat intelligence. However, modern threats often use legitimate tools like PowerShell and .NET, in-memory attacks and other advanced techniques which render traditional controls ineffective.

Your enterprise needs an endpoint security solution that takes a comprehensive, holistic approach. Cybereason Next-generation Antivirus offers organizations complete protection against known malware, unknown binary malware threats, ransomware, exploits, and in-memory and fileless malware.
MULTI-LAYERED APPROACH

Cybereason Next-generation Antivirus delivers a comprehensive protection stack for automatic defense. Immediately block known malware from running, with signature-based techniques. Leverage machine learning and behavior analytics to detect and prevent sophisticated malware that is typically missed by legacy AV products. Additional, dynamic layers of prevention keep you ahead of continuously evolving threats, allowing you to prevent attacks like never before.

DEFEND AGAINST RANSOMWARE INSTANTLY

Using behavioral analytics and deception techniques, Cybereason Next-generation Antivirus stops ransomware before encryption can take place. Analysts can detect and block unknown, fileless, and even MBR-based ransomware strains. Leverage our behavioral prevention, in conjunction with our deception techniques, to ensure no legitimate files are encrypted during an attack.

PREVENT FILELESS ATTACKS

Stop fileless attacks that use PowerShell or exploit .NET vulnerabilities by leveraging a combination of deep visibility and behavioral analytics. Cybereason Next-generation Antivirus not only analyzes the encoded or obfuscated command line, but also uses behavioral analytics to look at every action taken by the code running within the PowerShell engine, providing superior protection against fileless threats compared to other solutions.

SUPPORTED VERSIONS

WINDOWS ⊞

- » Windows 10
- » Windows 8.1
- » Windows 8
- » Windows 7 SP1, XP SP3
- » Windows Vista Server 2003, Server 2003 R2
- » Windows Vista Server 2008, Server 2008 R2

MACOS 🍎

- » macOS Mojave (10.14)
- » macOS High Sierra (10.13)
- » macOS Sierra (10.12)
- » Yosemite (10.10)
- » El Capitan (10.11)

LINUX 🐧

- » CentOS 6 and 7
- » Red Hat Enterprise Linux 6 & 7
- » Oracle Linux 6 & 7
- » Ubuntu 14 LTS & 16 LTS
- » Ubuntu 18.04
- » SLES 12
- » Debian 8 & 9
- » Amazon Linux AMI 2017.03

ONE LIGHTWEIGHT AGENT

Cybereason Next-generation Antivirus offers best-in-class prevention with minimal impact on speed and resources - and without needing to deploy multiple agents. Cybereason's unique technology enables the agent to run continuously in user space - eliminating the chance of system crashes while still providing analysts with full, unmatched visibility into all activities. Deploy Cybereason Next-generation Antivirus in as little as 24 hours with minimal organizational impact, and start preventing attacks the same day.

SAVE TIME, EFFORT, & MONEY

Cybereason Next-generation Antivirus provides high-fidelity alerts with low false positives to reduce the burden on your overworked SOC team. The platform automatically prevents ransomware, malware, and fileless malware by leveraging signatures, machine learning, deception techniques, behavior techniques, and deep script visibility. The platform prevents before the analyst has to engage, letting your SOC focus on more advanced threats and increasing productivity.

MATURE YOUR SECURITY WITH THE CYBEREASON PLATFORM

Cybereason protects you today while providing you with additional context and visibility to help you investigate threats in the future. By combining Cybereason Next-generation Antivirus and Cybereason EDR in a single solution, you can see the entire attack story for every attack prevented, all using the same console and agent as Cybereason Next-generation Antivirus. Automatically prevent malware execution on a critical asset like a production server, then instantly pivot to hunting down how the malware got there in the first place.
