PREVENTION

NGAV & ENDPOINT CONTROLS

❯ MULTILAYERED APPROACH

Dynamic layers of prevention keep you ahead of continuously evolving threats, allowing you to prevent attacks like never before.

❯ SINGLE, LIGHTWEIGHT AGENT

Cybereason uses one agent to run continuously in user space - eliminating the chance of system crashes while still providing analysts with full, unmatched visibility into all activities.

❯ FILELESS AND RANSOMWARE PREVENTION

Stop fileless attacks that use PowerShell or exploit .NET vulnerabilities as well as ransomware using behavioral analytics and deception techniques.

DETECTION & RESPONSE

EDR & FORENSICS
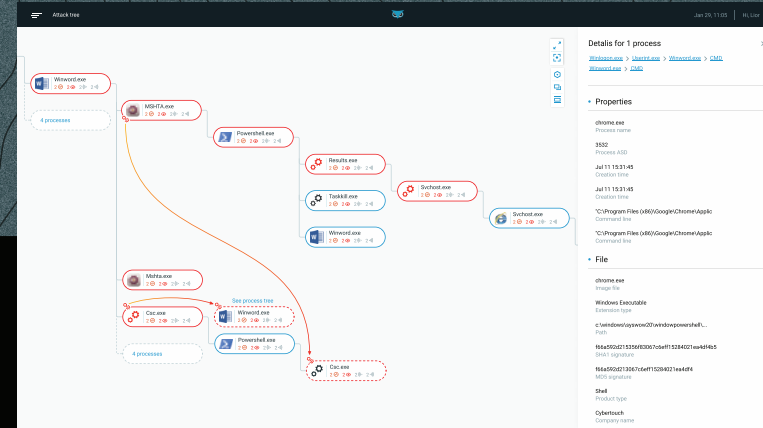

High-fidelity, context-rich detections give you the full story of an attack.

❯ ACTIONABLE THREAT DETECTION

Get actionable, detailed threat detection without the noise.
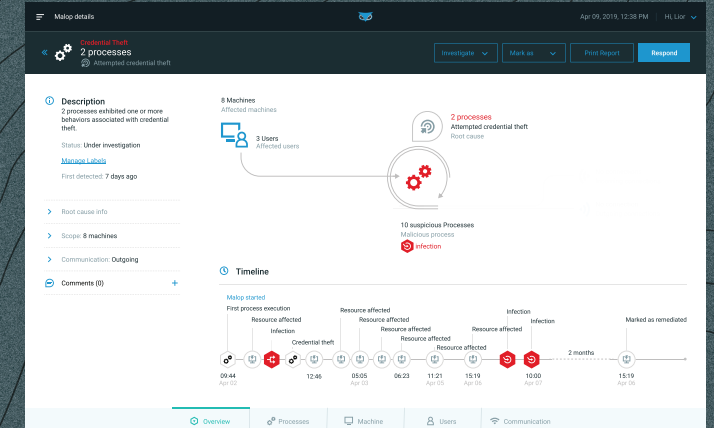

❯ CUSTOM DETECTION RULES

Build detection rules across platforms for Windows, macOS, and Linux.

❯ MULTIPLE REMEDIATION OPTIONS

Stop, remove, and isolate malicious operations with a single click.

ANALYTICS

THREAT HUNTING & ENDPOINT ANALYTICS

INFECTION

3 YEARS AGO
HISTORICAL DATA

TWO WEEKS AGO
INFECTION DETECTED

LIVE DATA

❯ EASILY HUNT THREATS

Cybereason's intuitive user interface gives analysts a syntax-free tool to investigate events and supports free-form, hypothesis-driven hunting.

❯ CUSTOMIZE & AUTOMATE

There's no reason to do a successful hunt twice. Automate successful hunts with custom rules.

❯ RETAIN ALL DATA

Cybereason delivers real-time access to every raw data point collected. Choose your retention period: 7, 15, 30, 60 or 90 days.
