

Safend Auditor Knowing is Controlling

If you don't see it, it can hurt you

Silently tracking your network's endpoints, Safend Auditor displays a real picture on your organization's information security. Running over the computers on your network, the clientless Auditor pinpoints all usage of USB, FireWire, PCMCIA, PCI, internal storage and WiFi connections in exportable reports.

Displaying complex current and historical information comprehensively, Auditor reports can be further manipulated to provide administrators the knowledge they need to create enforced companywide preventative policies.

Part of the Safend Data Protection Suite (DPS), Auditor searches for information according to Microsoft Active Directory, IP Range and Computer Name and is also successfully integrated into the Safend Protector.

Having the capacity to run on up to 60,000 computers, Auditor is already used as part of Safend security solutions in different market sectors.

Safend DPS, the Data Protection Suite

One DPS suite, one DPS agent

Clientless, Silent Monitoring

- Identification of USB, FireWire, PCMCIA, PCI, internal storage and WiFi connections usage on company endpoints
- Configuration of auditable computers and computer groups
- No requirement for endpoint client installations
- Strong reporting capabilities
- Quick auditing without interfering with network performance
- Different scan protocols
- Ability to define user-based permissions
- Variety of options to save and upload saved reports
- Runs as an offline tool or can be integrated into the Safend Management Server

System Requirements

Windows 7 x64

Windows 8.1 x86

Windows 10 x64

Windows 10 Anniversary

Windows 10 Creator

Windows Server 2008 R2 x86 / x64

Windows Server 2012

Windows Server 2012 R2

Windows Server 2016

About Safend, a SuperCom Company

Safend are providers of security products designed to protect against corporate data loss via comprehensive data encryption, port control, device control and content inspection solutions.

With over 3,000 customers worldwide and 3 million licenses sold, Safend software is deployed by multi-national enterprises, government agencies, healthcare organizations and small to mid-sized companies across the globe.

Founded in 1988, SuperCom is a leading global provider of advanced tracking, identification and security solutions.

Working as partners and promoting transparency and ethical business practices with their investors and with over 3500 customers and 20 governments worldwide, SuperCom is a publicly traded company on the NASDAQ National Market (SPCB).
