2021 VERIZON DBIR

WHEN...

7 out of 10

Users are all still making
up passwords

IDC

Today, all users are targets

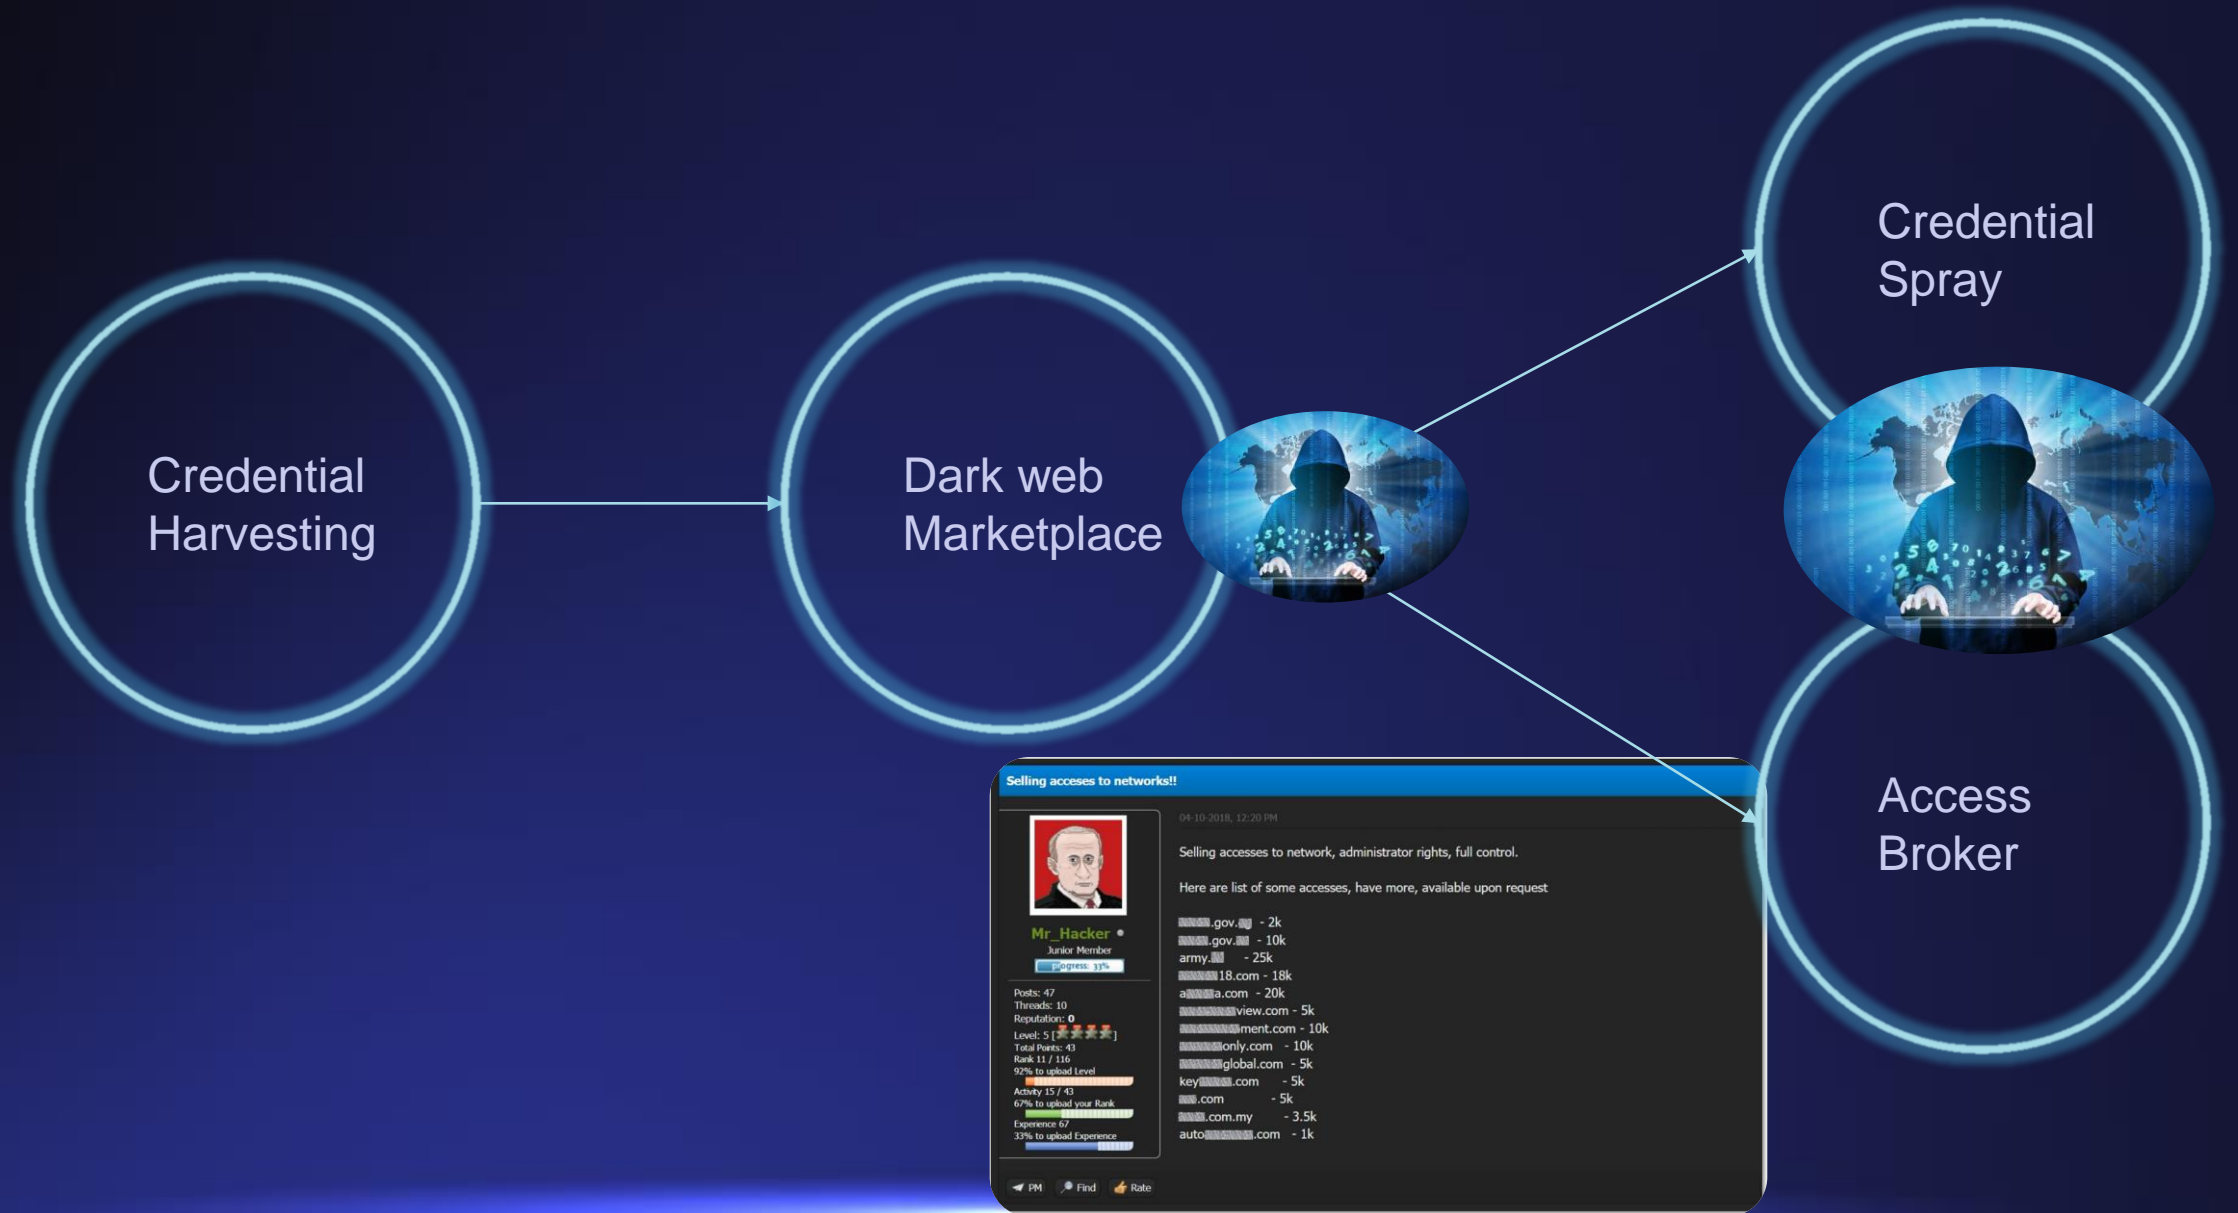

Data scraping

Phishing

Credential
Harvesting

The cybercriminal credential laundering business chain

Bad guys don't break in, they log in.

DIFFERENT USERS HAVE DIFFERENT NEEDS AND EXPECTATIONS

SALES EXECUTIVE

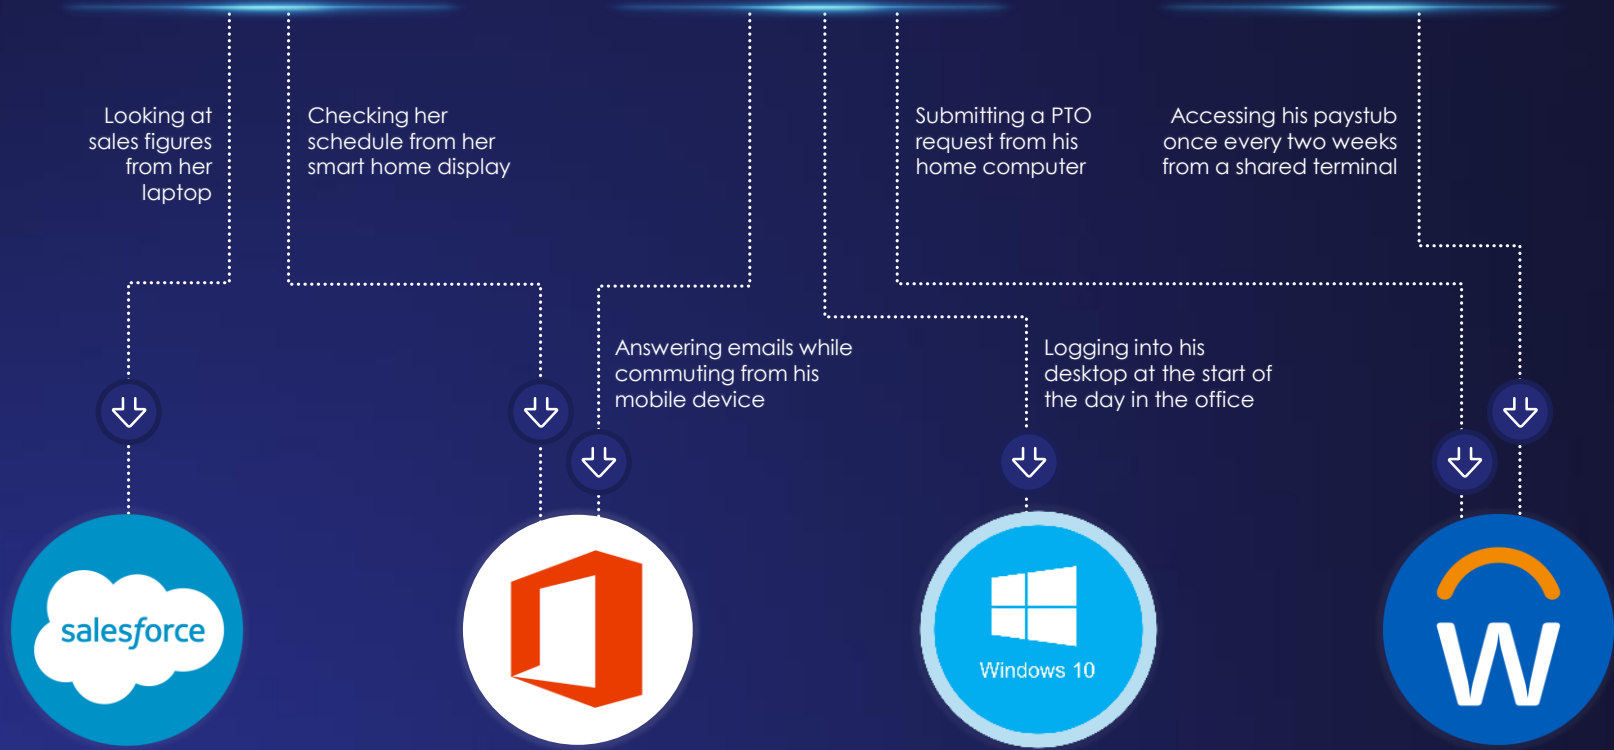

OFFICE WORKER

FRONTLINE WORKER

- Field based worker
- Office worker
- Administrator
- Supervisor
- User with own device
- Physically disabled
- Customer
- Delivery driver
- Zero hours worker
- Internship worker
- Returning worker
- Off sick worker
- Worker on holiday
- Third party supplier
- ...

MFA is a critical security mechanism but not all MFA is created equal

Authenticator apps have limitations

SMS is deprecated, OTP soon to be

Hardware can be difficult to manage

Users on shared workstations

Users without corporate issued devices

Frontline workers

Operate in hands-free environment

Limited mobile connectivity

A medieval battle scene featuring knights in full plate armor. In the foreground, a large knight in full armor is seen from the back, holding a sword. In the middle ground, three knights stand in a line, holding shields and swords. In the background, a stone castle with multiple towers and battlements is visible under a dark, overcast sky. The scene is set on a dirt battlefield with some smoke or dust in the air. A large blue diagonal graphic element is on the left side of the image.

REDEFINE ACCESS SECURITY

How can you

QUICKLY CLOSE AUTHENTICATION GAPS

across complex environments without
overburdening IT and users?

Secure access with **AUTHENTICATION EVERYWHERE**

Protect more apps
quickly and simply

Extend secure access to
more user constituencies

Leverage existing investments

SAFENET TRUSTED ACCESS:

We help you protect **MORE USERS** and **MORE APPS** with powerful authentication and AM capabilities

ACCESS MANAGEMENT AND AUTHENTICATION, DELIVERED AS A SERVICE

Make effective choices for MFA by focusing on **risk-appropriate options**, rather than check-box compliance, and **encompassing diverse UX needs**

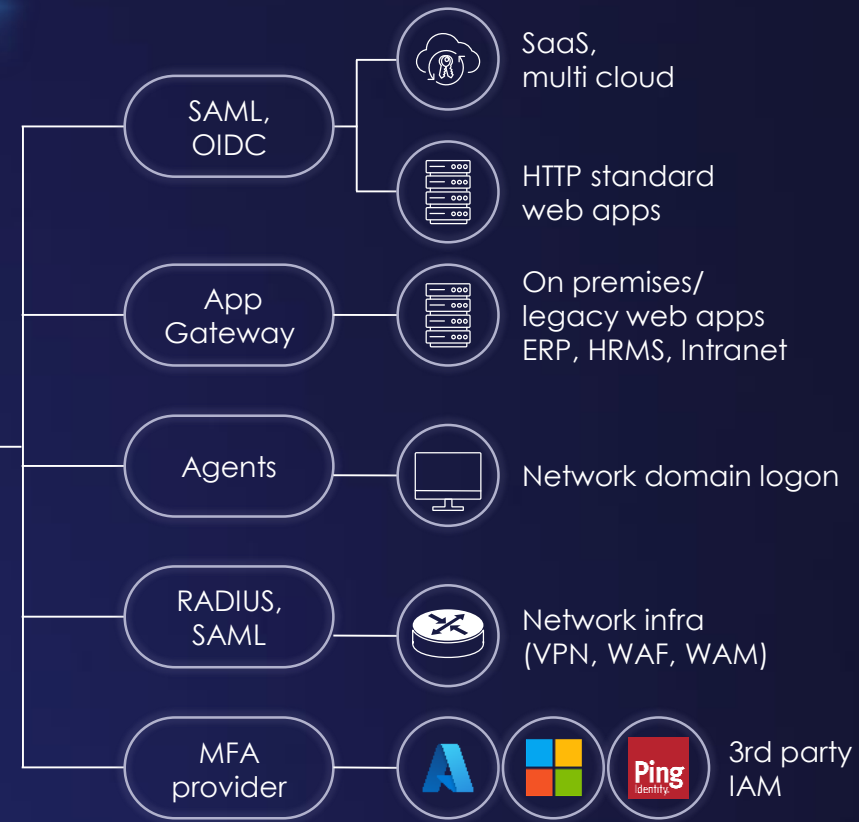

Gartner

REDUCE RISK ACROSS YOUR ENVIRONMENT WITH AUTHENTICATION EVERYWHERE

SAFENET TRUSTED ACCESS

Authentication Access policies SSO

PROTECT ALL USERS

- Expand user coverage
- Deliver modern passwordless authn
- Reduce management overheads

CONTROL RISKS IN REAL-TIME

- Real-time, continuous risk
- Assessments & remediation

PROTECT ALL ENVIRONMENTS & LOCATIONS

- Expand all environments & locations
- Complement 3rd party IAM tools

DEPLOY SECURE ACCESS QUICKLY & EFFICIENTLY

According to McKinsey,

75%

of cloud transformation projects run over budget, and

38%

go beyond schedule

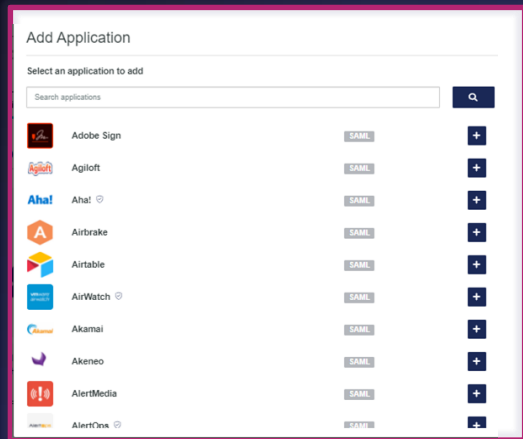

SPEED UP IMPLEMENTATION WITH SMOOTH POLICY CONFIGURATION
