

Cloud Readiness Assessment

Overview

Cloud Readiness Assessment is available to check the suitability and compatibility of a company's current on-premises server infrastructure and applications, and how these can be migrated to the cloud.

What does the service do?

This service provides an assessment of a company's current server infrastructure and applications. There are three assessment levels which range from basic budgetary cost to a full cloud migration strategy:

Level 1

- Server migration readiness assessment.
- Measurement of server performance to right size the for running in Azure.
- Provides a budgetary cost, based on sizing outputs.
- Provides a budgetary migration cost.

Level 2

- As Level 1
- Application assessment and dependencies.
- More in-depth migration plan including applications.

Level 2

- As Level 2 (including Level 1)
- Workshop
- Application stakeholder interviews
- Full security recommendations and governance.
- Platform as a Service refactoring of applications
- Application redundancy, fault tolerance and disaster recovery

Who is this service for?

The service is suited to companies wishing to migrate from traditional on-premises infrastructure to cloud hosted services.

About the service

Assessments are carried out by a Microsoft qualified Cloud Consultant.

Before commencement of an assessment, pre-sales will be undertaken to confirm the recommended assessment level and the anticipated time (and therefore cost).

Following the completed assessment, companies can choose to undertake further professional services to implement the recommended changes.
