

Power App Creation

Overview

The Microsoft Power Platform combines the robust power of PowerApps, PowerBI, and Power Automate into a single capable business application platform – providing quick and easy app building and data insights. Whether businesses are looking to build a solution for managing expenses, holiday entitlement, purchase orders, inventory management, on-site servicing, or a multitude of other processes, then look no further than the Microsoft Power Platform.

What does the service do?

The Power App Creation service allows businesses to entrust the design and implementation of these applications by an experienced Power Platform team. Build feature-rich, customised business processes that will integrate with and connect to your business data. The data can be stored in the cloud, on premise, in Microsoft sources or other vendor applications.

Who is the service for?

Businesses who are looking to replace cumbersome, time-intensive manual processes with an automated, modernised process, tailored to your specific needs.

If you are interested in the Power App Creation Service, or any other Professional Service, please contact your Business Development Manager.
