Limitations	2
Requirements	2

## Overview

Chance to have your own custom entry point into the CORE platform to give a more unified end-to-end experience for both yourself & end-customers\*. Facilitates the ability to secure your tenant further through SSO through Azure AD (isn't currently available for endcustomer).

**If you're wanting to make the new brands available to end-customers, we recommend creating 2 brands, one with Azure AD integrated and one without.**

## Timelines

We aim to deliver your completed integration setup within 5 working days of receiving the full requirements.

## Who should fill out this document?

It's recommended to forward this document to a decision maker with a technical ability within your organization due to a small amount of setup-enablement required from your side; especially if you wish to Azure AD integrate the brand(s) created.

# Limitations

- Your new brand URL will be the only endpoint that your customers will be able to use to login to the CORE system. For example, if you configure a brand of `https://core.infinigate.cloud` and set this as the default, all customers that are created after this date must use this URL to login to the CORE system (should you provide access to them).
- You can only have one “default” brand. The default is what is assigned to customers at the time of creation.
- The domain that will be used for the brand cannot exist under anywhere else in the CORE system. For example, `Infinigate.cloud` cannot exist under any other account in the system except the partner account; this includes a direct account.

## Requirements

To ensure that your brand is pointing to CORE, please ensure you add the relevant A record to your domain pointing to the IP: 51.132.28.140

For example:

- Domain/Host: `partner.infinigate.cloud`
- IP Address: 51.132.28.140
- TTL: Default/3600

Requirement	Your Entry	Infinigate Example
Entry point URL		partner.Infinigate.cloud
Custom Logo		 <p>This must be in a PNG or JPG/JPEG format (EPS files are not supported). The maximum size is 440x140px, please provide a transparent logo where possible to prevent coloured borders and clashes.</p>
Favicon		 <p>This should be in a genuine .ICO format and cannot not exceed 16x16px</p>
Required time zone	UTC	*UTC unless expressed otherwise
Desired Skin Theme (Select from Dropdown)	Choose an item. (Click the item above to activate the drop down to make a selection)	*If Custom, please be aware a charge may be incurred
