

Overcoming barriers to innovation in digital health

We help Healthcare IT vendors overcome data integration challenges by using the Innovaccer HealthCloud's Data Activation Platform, healthcare application suite, open APIs, and developer tools to create a truly interoperable solution —all centered around the patient.

Innovaccer provides the data foundation to build next-gen digital health innovations

Innovaccer offers a flexible, scalable enterprise healthcare platform with robust data integration and aggregation capabilities. Our healthcare data platform unifies data into a single longitudinal patient record to create actionable insights for providers.

Use Innovaccer's Data Activation Platform to speed up application development, reduce time to market, save on development costs, and serve your customers better

Prebuilt interfaces and ML-based data mapping

Reduce time spent on ETL by up to 80%.

- Access ML-based syntactic and semantic data mapping.
- Deploy built-in connectors to all communication protocols.
- Ingest data in various file formats.

EMPI and data quality tools

Continuously monitor data quality using more than 80 coding standards, 1,000 data attributes, and 6,000 business rules.

- Help providers assess quality, calculate payments, and review contract performance for individual patients.
- Track and monitor data for accuracy, consistency, validity, completeness, timeliness, and uniqueness.

Unified data model

Use data from disparate sources to generate a longitudinal record of patients.

- Deliver solutions to help care teams provide patient-centered, holistic care.
- Take advantage of a data lake designed for healthcare.
- Help providers gain enterprise-level security and comply with PHI/PII security, HIPAA, and ISO standards.

The challenges with traditional data architectures

- Patient health data is fragmented and siloed across disparate sources, hampering digital health companies from building and deploying new applications.
- Disparate data platforms and regulatory requirements result in high solution-development costs.
- Current data architectures hinder innovation and diminish patient experiences and care team satisfaction.

Healthcare analytics

Access a full suite of analytics for cost, quality, utilization, risk, and patient satisfaction.

- Access more than 600 prebuilt analytical models, 16 chart types, 10 standard dashboards, plus 250 quality utilization and cost measure dashboards, and 100 volume- and value-based reports.
- Deploy a power UI-based analytics model builder to define custom measures with version control.
- Empower care teams and administrators with real-time, relevant insights.

The solutions we offer

- Use Innovaccer's Data Activation Platform to ingest, aggregate, and normalize data from disparate sources.
- Speed up end-to-end application development using our extensible data models, FHIR-compliant APIs, and application suite.
- Gain insights and productize out-of-the-box AI/ML healthcare analytics.

What our partners and customers say:

"The interoperability of Innovaccer's Health Cloud will help empower providers to transform insights into action. We're thrilled to partner with Innovaccer and bring our data onto a single, scalable platform to reach a new level of data-informed decision-making."

J. Tod Fetherling

Founder, Chief Data Scientist,
Perception Health

"We're not only transforming patient care but also driving significant savings on our IT operating expenses."

Julie F. Smith

Vice President, Enterprise Data
Management and Governance,
Banner Health

"Innovaccer plays a central role in how we support our provider network. It delivers coordinated care for our community and helps us measure health outcomes in our region."

Alisha Fehrenbacher

FACHE CEO,
Elevate Health

We'll help you accelerate product development and create intelligent, scalable, and interoperable healthcare solutions.

Access more than 200 turnkey connectors

Reduce your customer deployments from months to weeks, accelerate speed to value with pre-built connectors to EHRs, payers, HIEs, pharmacies, labs, and other HIT systems

Access more than 30 FHIR APIs

Build modern, flexible healthcare solutions that foster industry-wide interoperability.

Use our world-class Data Activation Platform

Unify claims and clinical data from more than 1,000 data sources to cut data aggregation costs and accelerate application development.

Build custom analytics models

Create advanced data visualizations, dashboards, and reports using Microsoft Power BI.

Achieve bidirectional interoperability

Access our intelligent analytical engines to process your data with our function as a service (FaaS) platform.

Our partners

Roche is a global pioneer in pharmaceuticals and diagnostics focused on advancing science to improve people's lives. Roche uses the Innovaccer Health Cloud to solve technology and workflow barriers and support its NAVIFY Infection Management platform.

Creating the industry's first development platform backed by a shared data record, Zus aims to empower a wave of new, digital-first healthcare builders who will create digital health technologies and services that are cheaper, more customizable, and more personalized.
