INTRODUCTION

The Ayurvedic Pharmacopoeia of India (API) is a unique book of standards describing the quality, purity and strength of selected drugs that are manufactured, distributed, and sold by the licensed manufacturers in pan India. It is developed in two parts; the part one comprises of mono-monographs of medicinal substances of natural origin and part two includes selected compound formulations sourced from the schedule – I books under the Drugs and Cosmetics Act, 1940 comprising of popular Ayurvedic classics of different period of times. The first part of the Ayurvedic Formulary of India was published in 1978 and thereafter, the Ayurvedic Pharmacopoeia of India (mono-monograph) Part-I, Vol. I was published in the year 1989 and subsequently, the other volumes were published with their legalized status under Drugs and Cosmetics Act, 1940.

The ayurvedic pharmacopoeia of India(API) consist of two parts, part-1 and part-2 the former dealing with raw material of single drugs used by the ayurvedic, siddha

and Unani pharmaceutical manufacturers and the latter including the classical compound formulations.

Here we arrange the drugs with their all parts at a point in alphabetical orders from part-1 vol 1-6.so that in future the study of API is easy.
