Introduction: James V Forrestal died at the Bethesda Naval Hospital on May 22nd, 1949. His death was called a suicide. Several Inconsistencies marked the conclusion of a suicidal death leading to allegations of homicide possibly by covert Zionist influences. **Objective:** To determine odds of certainty that James Forrestal was a victim of homicide. **Method:** Application of the probability theory to project odds of certainty that James Forrestal was a victim of a homicide. **Results:** Consistent with 15 observations in support with James Forrestal was a victim of homicide and inconsistent with he was not a victim of a homicide Indicates James Forrestal was a victim of homicide. Odds of this observation being correct is 99.99%. **Discussion:** Clinical, forensic and mathematical evidence suggests James Forrestal was a victim of a homicide. The most likely cause of his murder is Forrestal's memoirs documenting that he atomic bombs were unnecessary to ensure the Japanese surrender and President Truman did not write or sign orders to drop atomic bombs on Hiroshima and Nagasaki. **Conclusion:** James Forrestal was a victim of a government sanctioned homicide.
