

Case No:  Date of visit:

Time spent on site:  Main Inspector:

Site No:  Site Name:   
 Business No:  Business Name:

Case Types: 1  2  3  4  5  6

Water Temp (°C):  Thermometer No:  FHI 045 completed

Observations: Region: TA Water type: F CoGP MA

Dead/weak/abnormally behaving fish present?  If yes, see additional information/clinical score sheet.  
 Clinical signs of disease observed?  If yes, see additional information/clinical score sheet.  
 Gross pathology observed?  If yes, see additional information/clinical score sheet.  
 Diagnostic samples taken?

UNI/REG only - if unable to carry out intended visit detail reason below:

**Additional Case Information:**

Remote inspection undertaken on 21/10/2021 by [REDACTED] observed by [REDACTED], a lead assessor and technical assessor as part of a UKAS assessment. Physical inspection undertaken by [REDACTED] on 22/10/2021 observed by [REDACTED] a lead assessor and technical assessor as part of a UKAS assessment

No issues with eye fluke. This was historically a problem but no longer an issue due to the installation of a disc filter. The filter manufacturer (Sterner) will be onsite when water temperature drops below 8 degrees and the filter can be turned off. This is to find a way to improve the inspection of the filter without taking it apart allowing for more frequent inspections

Next batch of eggs due in from Spain due to restrictions with eggs from Denmark.

RTFS treated on Tuesday before inspection using florocol, the treatment was reportedly successful. Once out of hatchery the fish often get RTFS at about 5-6g. As fish are vaccinated at 60-120g. Once vaccinated RTFS is no longer an issue. RTFS diagnosed by Pharmaq. A company vet worked for Dawnfresh Farming, but left the week previous to the inspection.

Dawnfresh are looking at replacing the fish vet with an external vet working for FVG.

Gill issues recently. Once fish exposed to river water after living in borehole derived water they get some issues on the gills. Some amoeba identified on gills. Pharmaq now contracted as fish vet. There is a fish health representative on site that works for Dawnfresh. Cress and florocol used to treat issues. Treatments were reportedly very successful.

Aquatet used to treat peritonitis post vaccination.

All fish sent to Tervine and Loch Etive sites (Etive 2 and 3) for on-growing

Import dates since last insp: 11/06/19, 15/10/19, 20/11/19, 07/01/20, 31/03/20, 12/05/20, 25/09/20, 16/11/20, 26/01/21, 23/03/21, 21/09/21

Import came in from S.Africa on 25/09/2020 and culled as the triploid rate was not high enough. These eggs were replaced.

270,000 fish culled on site. Not reported to FHI as it was a cull, not a mortality event.

Usually 4 movements on from outside GB in average year.

2020: wk 42 (2.7%) 2020 and wk 46 (6.2%) increased mortality due to egg cull. These were culled after an import from S.Africa. No signs of disease observed.

2021: wk 25 (4.6%) mortality related to filter blockage, this has been reported to FHI and investigated by FHI and APHA

Case No: **2021-0434** Site No: **FS0508**  
 Date of Visit: **22/10/2021** Inspector(s): **[REDACTED]**

**Registration/Authorisation Details**

1. Business/site details summary checked by site representative? **Y**  
 2. Changes made to details? **Y**

**Site Details (include cleaner fish for all sections)**

Total No facilities	26		Facilities stocked	9		No facilities inspected	26

Next Fallow Date (Site)	No plans			Next Input Date (Site)	Nov 2021			
Recent (last 4 wks) disease problems?				Y	Any escapes (since last visit)?			N
If yes, detail:	RTFS, some gill issues (see additional information)							

**Movement Records**

1. Movement records available for inspection? **Y**  
 2. Date of last inspection: **27/06/2019**  
 3. Are records complete and correctly entered? **Y**  
 4. Are movement records available for dead fish and waste? **Y**  
 5. Are records complete and correctly entered? **Y**  
 6. Are health certificates for introductions (outwith GB) available? **Y**

**Transport Records**

1. Are any movements carried out by (or on behalf) of the business (not using a STB)? **N**  
 If yes, is there a system in place for maintenance of transportation records? **[REDACTED]**

**Mortality Records**

1. Mortality records available for inspection? **Y**  
 2. How are mortalities disposed of? **Ensiled - on site**  
 If other detail: **[REDACTED]**  
 3. Mortality records complete and correctly entered? **Y**  
 4. Recent mortality (last 4 wks): **wk 42: 353 fish (0.05%), wk 41: 1522 fish (0.22%), wk 40: 2487 fish (0.35%),**  
 5. Evidence of recent increased/atypical mortalities? **N**  
 If yes, facility nos/no mortality per facility/no stock per facility/reason: **[REDACTED]**  
 6. Any other peaks in mortality during period checked? **Y**  
 If yes, detail: **See additional information.**  
 7. Have increased (unexplained) mortalities been reported to vet or FHI? **Y**  
 If yes, detail action: **Reported to company vet and FHI**  
 8. Have 'mortality events' been reported to FHI? If no, enter details on mortality events sheet. **Y**

**Treatments and Medicines Records**1. Recent treatments (see comment)?  YIf yes, detail: Florfenicol,  
Formalin,  
T.M.S.

If other, detail: Cress

2. Medicines records available for inspection?  Y3. Are records complete and correctly entered?  Y4. Are fish in a withdrawal period?  Y

5. If yes, what treatment(s)?

Florfenicol, Formalin, T.M.S.

If other, detail: Cress

6. Are medicines stored appropriately?  Y**Biosecurity Records**1. Biosecurity records available for inspection?  Y2. Has the manner and frequency of mortality removal, recording and safe disposal been considered?  Y3. Has the manner and period in which the APB will notify Scottish Ministers or veterinary professional of any *increased (unexplained)* mortality at the site been included?  Y4. Has the action that will be taken in the event that the presence or suspicion of the presence of a listed disease is detected been included and *how* and *when* that will be notified to Scottish Ministers?  Y5. Has the health status of aquaculture animals being stocked on the farm site been covered (equal or higher health status, certification if required)?  Y6. Have the husbandry and biosecurity measures implemented between each epidemiological unit to minimise transmission of disease been covered (movement of staff, visitors, equipment, live or dead fish etc.)?  Y7. Is documentation available regarding the measures in place to maintain the physical containment of aquaculture animals held on site?  Y8. Have the biosecurity procedures been adequately implemented on site?  Y

If no, detail:

**Results of Surveillance**1. Has any animal health surveillance been carried out by, or on behalf of, the business?  Y2. If yes, are results available for inspection?  Y3. Any significant results?  Y

If yes, detail (if not detailed under recent disease problems).

Site No: **FS0508**

**Sea Lice Inspection (Seawater Sites Only)**

1. Has the site experienced sea lice problems in the previous 4 years?
2. Is the CoGP Farm Management Area (or equivalent) fallowed synchronously on a single year class basis?
3. Does the site have access to a range of licenced in-feed and bath sea lice medications (including deltamethrin, azamethiphos and emamectin benzoate) as well as access to suitable biological and/or mechanical control measures, and can these be deployed in a reasonable period of time?
4. Is there a signed documented farm management agreement or statement relevant to the site and CoGP Farm Management Area (or equivalent)?
5. Are sea lice count records available for inspection? (Legal SSI, CoGP Annex 6)
6. Do records adequately reflect the required standard specified in the SSI and the CoGP? (Legal SSI, CoGP Annex 6)
7. Are sea lice (*L. salmonis*) record levels below the suggested criteria for treatment in the CoGP during the period that records are inspected? (CoGP Annex 6)
8. Have average adult female sea lice (*L. salmonis*) numbers per fish been at a level of 3 or above (prior to w/b 10/6/19) or 2 or above (from w/b 10/6/19) during the period that records are inspected?  
If yes, have these been reported to the Fish Health Inspectorate? If no, FHI see comment.
9. Is *C. elongatus* infestation at a level which is considered to cause significant welfare problems? (CoGP 4.3.81, 5.3.50)
10. Have therapeutic treatments been administered or other actions taken when *L. salmonis* levels have exceeded the suggested criteria for treatment or where *C. elongatus* is considered to have welfare implications? (CoGP 4.3.82, 5.3.51)
11. Has any other action been taken (where applicable)?
12. Have therapeutic treatments or the actions taken had a significant impact upon the lice levels recorded?
13. Are treatments, where conducted, carried out in cooperation between participating farms?
14. Is there a harvesting strategy for the site, where fewer populations or part populations are held without treatment for sea lice?
15. Is there a site specific written lice management procedure with waypoints describing set actions to deal with recognised scenarios during the escalation of a sea lice infestation?
16. Do the sea lice levels observed on stocks reflect sea lice count data? If no please detail reasons.

**Containment Inspection**

1. Has the site experienced equipment damage due to predators in the current or previous production cycles?  N
2. Are measures in place to mitigate against the predation experienced on site? (Detail below)  Y

Bird nets, electric fence, some facilities in polytunnels, pest control contract, wildlife log maintained

If other, detail below:

3. Have escape incidents or events been experienced on or in the vicinity of the site since the last FHI inspection?  N  
If Yes proceed with questions 4 – 9. If No skip to question 10
4. Have these been reported to Scottish Ministers?
5. Have these been reported to local DSFB forthwith (where they exist)? (CoGP – 4.4.37, 5.4.17)
6. Have these been reported to the SSPO and local fisheries trusts forthwith (where they exist)? (CoGP – 4.4.37, 5.4.17)
7. Were methods (if any) used to recover escapees? If yes give detail
8. If gill nets were deployed was this action agreed with local wild fish interests and was permission given by Scottish Ministers? (Legal, CoGP – 4.4.38, 5.4.18)
9. What action was taken to prevent and minimise the risk of further escapes? (Not covered in code but could be considered under satisfactory measures of the Act)
10. Is the site inspected as satisfactory with regards to containment? If no, please detail reason(s)  Y

# FISH HEALTH INSPECTORATE VISIT REPORT

## SUMMARY FOR INFORMATION OF SITE OPERATOR

<b>BUSINESS No</b>	FB0456	<b>DATE OF VISIT</b>	22/10/2021
<b>SITE No</b>	FS0508	<b>SITE NAME</b>	Kinnaird Mill Trout
<b>CASE No</b>	20210434	<b>INSPECTOR</b>	██████████

### Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

#### Records

The surveillance frequency category of the site was assessed as high. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted annually. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

Mortality levels had exceeded the reporting criteria since the last inspection and had been reported to the Fish Health Inspectorate as required.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Scotland were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

### Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Medicine records were inspected and found to be adequately maintained.

R04

Samples were taken to be analysed for veterinary residues.

**Inspection under the Aquaculture and Fisheries (Scotland) Act 2007**

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007 with respect to section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Signed:

Date: 05/11/2021

Fish Health Inspector

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Marine Scotland website at <https://www.gov.scot/publications/fish-health-inspectorate-service-charter/>
