UNI/REG only - if unable to carry out intended visit detail reason below:

Additional Case Information:

Lumpfish eggs imported from Norway: 1st batch 28/04/2022 and 2nd batch 19/05/2022 from Soroya Renefisk

Ballan wrasse transferred from Angelsey (MOWI) in december 2021. Pre transfer checks conducted.

Halibut broodstock kept at Evanachan Salt Water and stripping into Evanachan Marine Hatchery for hatching and are grown on

Routine treaments occur on site to hinder growth of filamentous bacteria. Treatments that are used are Formalin and Pyceze.

On stream, new facilities have been constructed and are in operation since March 2022. Site details will be updated to reflect these changes.

Remote paperwork conducted by [REDACTED] on 02/06/2022 and supervised by [REDACTED]

VMD sampled on 09/06/2022 by [REDACTED], supervised by [REDACTED]. All fish sampled were observed to be healthy and in good condition.

Treatments and Medicines Records

1. Recent treatments (see comment)?

N

If yes, detail:

If other, detail:

2. Medicines records available for inspection?

Y

3. Are records complete and correctly entered?

Y

4. Are fish in a withdrawal period?

Y

5. If yes, what treatment(s)?

T.M.S.

If other, detail:

6. Are medicines stored appropriately?

Y

Biosecurity Records

1. Biosecurity records available for inspection?

2. Has the manner and frequency of mortality removal, recording and safe disposal been considered?

3. Has the manner and period in which the APB will notify Scottish Ministers or veterinary professional of any *increased (unexplained)* mortality at the site been included?4. Has the action that will be taken in the event that the presence or suspicion of the presence of a listed disease is detected been included and *how* and *when* that will be notified to Scottish Ministers?

5. Has the health status of aquaculture animals being stocked on the farm site been covered (equal or higher health status, certification if required)?

6. Have the husbandry and biosecurity measures implemented between each epidemiological unit to minimise transmission of disease been covered (movement of staff, visitors, equipment, live or dead fish etc.)?

7. Is documentation available regarding the measures in place to maintain the physical containment of aquaculture animals held on site?

8. Have the biosecurity procedures been adequately implemented on site?

If no, detail:

Results of Surveillance

1. Has any animal health surveillance been carried out by, or on behalf of, the business?

2. If yes, are results available for inspection?

3. Any significant results?

If yes, detail (if not detailed under recent disease problems).

FISH HEALTH INSPECTORATE VISIT REPORT

SUMMARY FOR INFORMATION OF SITE OPERATOR

BUSINESS No	FB0012	DATE OF VISIT	09/06/2022
SITE No	FS0843	SITE NAME	Evanachan Marine Hatchery
CASE No	20220188	INSPECTOR	[REDACTED]

Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

The above site was visited in accordance with the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015.

Samples were taken to be analysed for veterinary residues.

The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

Records

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated.

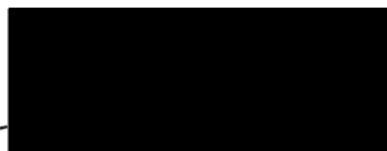

Medicine records were inspected and found to be adequately maintained.

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Signed:

Date: 13/06/2022

Fish Health Inspector
