Additional Case Information:

Last batch of eggs received on site from Trout Lodge, USA. The stamp section of the health certificate was embossed. There are 2 standard comp hatches in the hatchery

The hatchery on site takes fish up to about 5g, at which stage they are grown on in the polytunnels and then finally transferred out to the outdoor ponds

Hatchery emptied each summer from July for about 2 months. All facilities are cleaned and disinfected at that time
Disk filter installed which filters water down to 30 microns to combat eye fluke. Reportedly there have been very few incidences

Almost all ova from Trout Lodge. Manager very happy with survival rate and growth rate post hatch.

of eye fluke on site since the installation of the disk filter. Eye fluke used to be an issue on site.

Slight increase in mortality in first feed fry starting the week of Christmas 2022 due to suspected RTFS. After treatment with florocol (500 DD withdrawal) the mortality rate was greatly reduced. During this two week event; 7,700 fish at 0.9g were lost. Company biologist was called and visited the site.

One dead fish observed on site during inspection of facilities

FISH HEALTH INSPECTORATE VISIT REPORT

SUMMARY FOR INFORMATION OF SITE OPERATOR

Business No FB0456 Date of Visit 24/03/2023

SITE NO FS0508 SITE NAME Kinnaird Mill Trout
CASE NO 20230123 INSPECTOR

Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

Records

The surveillance frequency category of the site was assessed as high. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted annually. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

No mortality levels exceeding the reporting criteria have been recorded since the last inspection.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Scotland were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

Medicine records were inspected and found to be adequately maintained.

Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007 with respect to section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Signed: Date: 28/03/2023
Fish Health Inspector

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Marine Scotland website at https://www.gov.scot/publications/fish-health-inspectorate-service-charter/
