

Case No:	2023-0453	Date of visit:	16/11/2023			
Time spent on site:	3.5 hours	Main Inspector:				
Site No:	FS0180	Site Name:	Loch Earn			
Business No:	FB0456	Business Name:	Dawnfresh Farming Ltd			
Case Types:	1 ECI	2 CNI	3 VMD	4	5	6
Water Temp (°C):	8.9	Thermometer No:	T274	FHI 045 completed		
Observations:	Region:	TA	Water type:	F	CoGP MA	
Dead/weak/abnormally behaving fish present?	N	If yes, see additional information/clinical score sheet.				
Clinical signs of disease observed?	N	If yes, see additional information/clinical score sheet.				
Gross pathology observed?	N	If yes, see additional information/clinical score sheet.				
Diagnostic samples taken?	N					
UNI/REG only - if unable to carry out intended visit detail reason below:						

Additional Case Information:

17 pens - 5 8m squares 8m deep nets, 6x 50m circles 12m deep nets, 6x60m circles 12m deep nets

Nets are all 22.5mm dyneema. New top nets recently purchased.

All triploid fish stocked from New Farm Selcoth, next year will also stock from Frandy

Total number on site - 149411, overall average weight across site 1.87kg, biomass 280092kg

Stocking density average 7kg/m³, highest pen is 12kg/m³ stocking density. Circle pens are all stocked with final numbers, only get closer to 15kg/m³ prior to harvest. Swim throughs are conducted at square pens.

Harvesting - pens towed to pier and bled and stunned into harvest bins - cage emptied in 2-4 days - harvesting every few weeks in spring/summer last harvest 18th October next in March 24.

Some higher morts due to PKD, BKD, Otter predation - peaking at 25 PKD, BKD/day and 40 for otter - sporadic - no significant peaks. Average mortality for the whole of 2023 so far is 0.6%

Fish are regularly health checked by staff who are all trained and competent at sampling.

ROV checks conducted on nets - monthly at least, and before towing pens or swim through.

Otter predation has left marks on some fish, particularly pens that had just moved over from the square pens but they are not moribund, lethargic and doing well. These are removed if become lethargic. No damage to equipment from otter predation but damaging fish through the nets.

Inspection and sampling conducted by [REDACTED] observed and audited by [REDACTED]

Sea Lice Inspection (Seawater Sites Only)

1. Has the site experienced sea lice problems in the previous 4 years? ☐
2. Is the CoGP Farm Management Area (or equivalent) fallowed synchronously on a single year class basis? ☐
3. Does the site have access to a range of licenced in-feed and bath sea lice medications (including deltamethrin, azamethiphos and emamectin benzoate) as well as access to suitable biological and/or mechanical control measures, and ☐
4. Is there a signed documented farm management agreement or statement relevant to the site and CoGP Farm Management Area (or equivalent)? ☐
5. Are sea lice count records available for inspection? (Legal SSI, CoGP Annex 6) ☐
6. Do records adequately reflect the required standard specified in the SSI and the CoGP? (Legal SSI, CoGP Annex 6) ☐
7. Are sea lice (*L. salmonis*) record levels below the suggested criteria for treatment in the CoGP during the period that records are inspected? (CoGP Annex 6) ☐
8. Have average adult female sea lice (*L. salmonis*) numbers per fish been at a level of 3 or above (prior to w/b 10/6/19) or If yes, have these been reported to the Fish Health Inspectorate? If no, FHI see comment. ☐
9. Is *C. elongatus* infestation at a level which is considered to cause significant welfare problems? (CoGP 4.3.81, 5.3.50) ☐
10. Have therapeutic treatments been administered or other actions taken when *L. salmonis* levels have exceeded the suggested criteria for treatment or where *C. elongatus* is considered to have welfare implications? (CoGP 4.3.82, 5.3.51) ☐
11. Has any other action been taken (where applicable)? ☐
12. Have therapeutic treatments or the actions taken had a significant impact upon the lice levels recorded? ☐
13. Are treatments, where conducted, carried out in cooperation between participating farms? ☐
14. Is there a harvesting strategy for the site, where fewer populations or part populations are held without treatment for ☐
15. Is there a site specific written lice management procedure with waypoints describing set actions to deal with recognised ☐
16. Do the sea lice levels observed on stocks reflect sea lice count data? If no please detail reasons. ☐

Containment Inspection

1. Has the site experienced equipment damage due to predators in the current or previous production cycles? ☐ N
2. Are measures in place to mitigate against the predation experienced on site? (Detail below) ☐ Y

Tensioned nets Top nets A.D.D.

If other, detail below:

3. Have escape incidents or events been experienced on or in the vicinity of the site since the last FHI inspection? ☐ N
If Yes proceed with questions 4 – 9. If No skip to question 10
4. Have these been reported to Scottish Ministers? ☐
5. Have these been reported to local DSFB forthwith (where they exist)? (CoGP – 4.4.37, 5.4.17) ☐
6. Have these been reported to the SSPO and local fisheries trusts forthwith (where they exist)? (CoGP – 4.4.37, 5.4.17) ☐
7. Were methods (if any) used to recover escapees? If yes give detail ☐
8. If gill nets were deployed was this action agreed with local wild fish interests and was permission given by Scottish Ministers? (Legal, CoGP – 4.4.38, 5.4.18) ☐
9. What action was taken to prevent and minimise the risk of further escapes? (Not covered in code but could be considered under satisfactory measures of the Act) ☐
10. Is the site inspected as satisfactory with regards to containment? If no, please detail reason(s) ☐ Y

FISH HEALTH INSPECTORATE VISIT REPORT

SUMMARY FOR INFORMATION OF SITE OPERATOR

BUSINESS No	FB0456	DATE OF VISIT	16/11/2023
SITE No	FS0180	SITE NAME	Loch Earn
CASE No	20230453	INSPECTOR	

Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

Records

The surveillance frequency category of the site was assessed as low. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted every third year. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

No mortality levels exceeding the reporting criteria have been recorded since the last inspection.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Directorate were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Samples were taken to be analysed for veterinary residues.

Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007 with respect to section 5 regarding containment and escapes.

R04 UKAS accredited testing laboratory No. 1964
