Water Temp (°C): 14.3	Thermometer No:	T307	FHI 045 completed N/A
Observations:	Region: TA	Water type: F	CoGP MA
Dead/weak/abnormally behaving to Clinical signs of disease observed Gross pathology observed? Diagnostic samples taken?	•	Y If yes, see additional in	nformation/clinical score sheet. nformation/clinical score sheet. nformation/clinical score sheet.
UNI/REG only - if unable to carry	out intended visit deta	il reason below:	

Additional Case Information:

Announced VMD inspection for VMD Audit. Accompanied by and and and from VMD.

No fish treatments carried out on site. Ponds fallowed individually, copper sulphate and chloramine T used to disinfect the empty ponds and kill snails. No VMPs stored on site.

Mortality event Jan-Feb 2023 2,848 fish (7.7%) - overstocking due to no customers. Mixture of culls and mortalities so event below threshold for reporting.

The 2020 population is currently suffering with high numbers of eye fluke. Many of the fish observed were blind. One fish was removed for further examination - excess mucus and cataracts were observed along with lack of feeding. No internal clinical signs were observed.

The fish sampled for the VMD were feeding well and appeared healthy both internally and externally.

Evidence of FS numbers included in movement record supplied on 04/09/2024.

 Inspector

Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

Records

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and found to be inadequately maintained.

Mortality records were inspected and found to be adequately maintained.

No mortality levels exceeding the reporting criteria have been recorded since the last inspection. However, as discussed, I would like to remind you of the industry agreement in relation to mortality reporting as detailed in A Code of Good Practice for Scottish Finfish Aquaculture –

Where the level of fish mortality exceeds the threshold(s) below, this should be notified to the Fish Health Inspectorate and the veterinary surgeon who has the fish under his/her care:

- Egg to 1st feed 6% weekly
- 1st feed to 5g 3% weekly
- 5g to smolting -1.5% weekly

The following points were raised with the site representative during the inspection:

 Movement records for dead fish waste were not available for inspection. Please ensure that these records are maintained for all future inspections. No further action is required.

Movement and transport records were found to be incomplete. Movement records
must include the following details: source or receiving site name and FS/FIS number.

These must be addressed to ensure the conditions of authorisation for your Aquaculture Production Business (APB) are being met. Records or documentation demonstrating that these points have been addressed should be sent to the Fish Health Inspectorate (contact details below) within 30 days of the date this report was issued.

Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Medicine records were inspected and found to be adequately maintained.

Samples were taken to be analysed for veterinary residues.

Please contact myself or the duty inspector should you require any assistance or clarification in implementing any requirement or recommendation detailed in this report.

Signed:

Fish Health Inspector

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Scottish Government website at <u>Fish Health Inspectorate Service Charter - gov.scot</u> (www.gov.scot)

Case completion report

Recommendations in relation to the above case were made for implementation by 27/09/2024. Following submission of the required documentation, evidence has now been provided to the Fish Health Inspectorate to demonstrate that the recommendations have been implemented.

This case will now be closed. This site may be subject to further audit and recommendations in the future.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Signed:

Fish Health Inspector
