New site stocked for the first time in week 22 2024. Site authorised for 6 cages but currently only 3 are in the water. The remaining 3 pens will be installed later in the year.

Site to be used as grower site for nearby Cooke nursery sites. Fish were treated with freshwater as they were being transferred (5 hour treatment). Risk assessment available for seawater movement. Site currently harvesting.

Mortality is uplifted by Foover and taken in mort bins to pier on Westray. The site is not remote fed, due to its offshore location. Feed blower on work boats conduct the feeding instead.

Fish were sitting deep in the water but those that were observed appeared in good physical health and were active in the cages. No dead fish or moribunds observed.

Fish sampled for the VMD had good feeding response and appeared healthy both internally and externally.

10 fish were also removed to inspect the site's sea lice counting procedures. Low levels of sea lice observed, predominantly caligus.

| Case No: 2024-0309  | Site No:   | FS1357                                |
| Sea Lice Inspection (Seawater Sites Only)   |  |                                       |
| 1. Has the site experienced sea lice problems   | s in the previous 4 years?   |                                       |
| 2. Is the CoGP Farm Management Area (or e   | quivalent) fallowed synchronously on a single y  | vear class basis?                     |
|   | enced in-feed and bath sea lice medications (in  |                                       |
| azamethiphos and emamectin benzoate) as can these be deployed in a reasonable period                  | well as access to suitable biological and/or mec<br>d of time?                           | hanical control measures, and         |
| 4. Is there a signed documented farm manag<br>Management Area (or equivalent)?                        | ement agreement or statement relevant to the s   | ite and CoGP Farm                     |
| 5. Are sea lice count records available for ins   | pection? (Legal SSI, CoGP Annex 6)   |                                       |
| 6. Do records adequately reflect the required   | standard specified in the SSI and the CoGP? (L   | .egal SSI, CoGP Annex 6)              |
| 7. Are sea lice ( <i>L. salmonis</i> ) record levels be records are inspected? (CoGP Annex 6)         | low the suggested criteria for treatment in the C  | oGP during the period that            |
| 8. Have average adult female sea lice ( <i>L. sal</i> 2 or above (from w/b 10/6/19) during the period | <i>monis</i> ) numbers per fish been at a level of 3 or a od that records are inspected? | above (prior to w/b 10/6/19) or       |
| If yes, have these been reported to the Fish H  | Health Inspectorate? If no, FHI see comment.   |                                       |
| 9. Is <i>C. elongatus</i> infestation at a level which  | is considered to cause significant welfare probl   | ems? (CoGP 4.3.81, 5.3.50)            |
| 10. Have therapeutic treatments been admini   | stered or other actions taken when L. salmonis   | levels have exceeded the              |
| suggested criteria for treatment or where C. e  | elongatus is considered to have welfare implicat   | tions? (CoGP 4.3.82, 5.3.51)          |
| 11. Has any other action been taken (where a  | applicable)?   |                                       |
| · · · · · · · · · · · · · · · · · · ·   | is taken had a significant impact upon the lice le                                       |                                       |
|   | l out in cooperation between participating farms?  |                                       |
| 14. Is there a harvesting strategy for the site, sea lice?  | where fewer populations or part populations are  | e held without treatment for          |
| 15. Is there a site specific written lice manage scenarios during the escalation of a sea lice it     | ement procedure with waypoints describing set a infestation?                             | actions to deal with recognised       |
| 16. Do the sea lice levels observed on stocks   | s reflect sea lice count data? If no please detail r                                     | easons.                               |
| Containment Inspection  |  |                                       |
| -   | ge due to predators in the current or previous pr  | roduction cycles?                     |
|   | the predation experienced on site? (Detail below   |                                       |
| Sealpro nets, top   | · · · · ·  |                                       |
| If other, detail below:   |  |                                       |
| 3. Have escape incidents or events been exer  | perienced on or in the vicinity of the site since th                                     | e last FHI inspection? N              |
| If Yes proceed with questions 4 – 9. If No ski  | •  | · · · · · · · · · · · · · · · · · · · |
| 4. Have these been reported to Scottish Minis   |  |                                       |
| 5. Have these been reported to local DSFB for   | orthwith (where they exist)? (CoGP - 4.4.37, 5.4   | 4.17)                                 |
| 6. Have these been reported to the SSPO an  | d local fisheries trusts forthwith (where they exis                                      | st)? (CoGP – 4.4.37, 5.4.17)          |
| 7. Were methods (if any) used to recover esc  | apees? If yes give detail  |                                       |
| 8. If gill nets were deployed was this action a   | greed with local wild fish interests and was perm  | nission given by Scottish             |
| Ministers? (Legal, CoGP $- 4.4.38, 5.4.18$ )  |  |                                       |
| 9. What action was taken to prevent and min   | imise the risk of further escapes? (Not covered i  | n code but could                      |
| be considered under satisfactory measu  | res of the Act)  |                                       |
| 10. Is the site inspected as satisfactory with r  | egards to containment? If no, please detail reas   | on(s) Y                               |
|   |  |                                       |

# FISH HEALTH INSPECTORATE VISIT REPORT

## SUMMARY FOR INFORMATION OF SITE OPERATOR

 BUSINESS NO
 FB0095

 SITE NO
 FS1357

 CASE NO
 20240309

DATE OF VISIT21/08/2024SITE NAMEEast MoclettINSPECTORInspector

### ENHANCED SEA LICE INSPECTION

An enhanced sea lice inspection to ascertain the levels of sea lice and for assessing the measures in place for the prevention, control and reduction of sea lice was conducted in accordance with the Aquaculture and Fisheries (Scotland) Act 2007.

The visit consisted of an inspection of records with regards to sea lice, the stock on site, site procedures with regards to sea lice and the provision of advice.

#### a) Inspection of sea lice records

The site meets the requirement of current Scottish industry best practice. There were no recommendations made and no further action is required.

#### b) Inspection of records relating to treatment and control of sea lice

The site meets the requirement of current Scottish industry best practice. There were no recommendations made and no further action is required.

# c) Inspection of records relating to farm management groups and area management agreements.

The site meets the requirement of current Scottish industry best practice. No recommendations made and no further action is required.

#### d) Inspection of records relating to training and procedures

The site meets the requirement of current Scottish industry best practice. No recommendations made or further action required.

#### e) Inspection of site and site stock

The site meets the requirement of current Scottish industry best practice. No recommendations made or further action required.

#### f) Inspection of farm count procedures

An inspection of site staff conducting and recording a sea lice count was carried out. This met the requirements of The Fish Farming Business (Record Keeping) (Scotland) Order 2008 and CoGP. No further recommendations or further action required.

R10

# **Further Action**

Signed:

The site meets the requirement of current Scottish industry best practice. No further recommendations are made, or further action required.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

### Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

#### **Records**

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Records in relation to aquaculture animals transported by the business were inspected and found to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

No mortality levels exceeding the reporting criteria have been recorded.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Directorate were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

# Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Medicine records were inspected and found to be adequately maintained.

Samples were taken to be analysed for veterinary residues.

## Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007, as amended, with respect to section 3 regarding parasites (sea lice), section 4A regarding fish farm management agreements and statements and section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory with regards to fish farm management agreements and statements and containment and escapes.

An enhanced sea lice inspection was conducted. A separate report will be issued in due course.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.
