Previous crop; fallow 15/9/23 restocked 15/12/23 from Knock 2023 Q4

Cleaner Fish: Stocked from 08/07/24- locally wild caught ballan wrasse supplied by The Cleaner Fish Company

SLICE treatments 19-25/2/24, 20-26/3/24, 14-20/6/24, 29/7-4/8/24;FW(3hrs) 17-20/6/24; Thermolicer 7-8/8/24, 22-25/11/24; FW(6hrs) 28/9-4/10/24

Paperwork 30/1/25 and 31/1/25 remotely. Inspection 5/2/25 Sea lice figures; wk2 2025 0.55, wk3 2025 0.13 (average adult female leps)

Morts collected and taken to mort yard (Twatt) then transported to Pelgia in Bulker into ferry for final disposal.

Current mortalities attributed to Storm Damage, handling (harvest) and complex gill issues.

Wrasse mortality currently low with none observed in the last 4 weeks. Peak in week 40. Salmon on site were undergoing a 6 hour FW well boat treatment. All wrasse were captured with box net and hand nets. As wrasse had complex gill issues they were treated separately in bins of freshwater - 2-3 hours planed treatments. No issues were reported except in Pen 12 were 500 morts occurred from 900 population. Fish were added to the FW and within 5 mins it was apparent there was an issue and they were immediately transferee back to sea water. Treatment conducted under vet advice with risk assessment, gill swabs and physical checks.

Plankton samples taken daily, AGD swabs done weekly.

All harvest on site are live haul to Lerwick or South Shian.

Lice levels currently low with no planned treatments, gill scores good -AGD low PGD moderate, mort levels currently low. Reports of "fungus" on sea lice so samples of sea lice were collected during the observation of the sea lice count for examination.

Point for consideration	Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary
the date of administration	High	Y		
amount administered	High	Y		
identification of fish treated	High	Y		
withdrawal period	Medium	Y		
2.5 Have therapeutic treatments or the actions taken had a significant	High	Y		
impact upon the lice levels recorded?				
Inspect records to confirm. Significant impact - ≥50% reduction in site average <i>L.salmonis</i> numbers (all stages)				
2.6 If other methods are employed on site to control sea lice and their impact is there a record of:	Low	Y	SSI, 1,4	
the nature and date of the method employed; the identification number of all facilities subjected to the method; the name of the person employing the method				
2.7 Where medicines have been acquired is there a record of:			VMD 19	
proof of purchase of the medicine concerned	Medium	Y	VMD 17	
name of the product	High	Y		
batch number	High	Y		
the date of purchase	Medium	Y		
the quantity purchased	High	Y		
the name and address of the supplier	Medium	Y		
2.8 Where medicines have been disposed is there a record of:			VMD 19	
the date of disposal	Medium	N/A		no incidence of medicine disposal
the quantity of product involved	Medium	N/A		
how and where it was disposed of	Medium	N/A		
2.9 Are veterinary health plans available which detail bio-security	Medium	Y	CoGP 4.3.129, 5.3.83	
protocols, preventative measures and treatments in relation to sea lice?				
Consider the following points over a percentage of treatments conducted on site				
2.10 Has the recommended course of treatments been completed?	Medium	Y	CoGP 4.3.134, 5.3.88	
2.11 If not, is there a recorded acceptable reason for not completing treatment?	Medium	N/A	CoGP 4.3.135, 5.3.89	
2.12 Was advice taken from the Veterinary surgeon in such	Medium	N/A	CoGP 4.3.135, 5.3.89	
circumstances?				
2.13 Are there clear written instructions regarding medicine use,	Medium	Y	CoGP 4.3.133, 5.3.87	
available to those responsible for treatment administration?				
2.14 Does the site have treatment discharge consents relevant to sea lice?		Y	Detail if necessary:	SLICE - only currently used.
c. Inspection of records relating to farm management groups and	farm manager	ment agreements	s or statements	
3.1 Is there a nominated farmer acting as coordinator and point of	Low	Y	SSI 1,5,b	
contact for this farm or area inclusive of this farm?			CoGP 4.3.75, 5.3.44	

Point for consideration	Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary
3.2 Is there a written undertaking that the farm will observe the	Low	Y	CoGP 4.3.76, 5.3.45	
provisions of the NTS ⁶ ?				
3.3 Has an area group been formed within the area containing the	Medium	Y	CoGP 4.3.77, 5.3.46	
site?				
3.4 Does the remit of the area group have appropriate veterinary	Medium	Y	CoGP 4.3.77, 5.3.46	
involvement? Consider:			SSI 1,5, c	
-agreed basis for monitoring sea lice				
-coordinated monitoring and treatment -co-operation between participating farms				
This may require follow up investigation conducted off site to			•	
determine				
3.5 Are records available of any decisions made by the FMG in	Low	Y	SSI 1, 5, c	
relation to the prevention, control and reduction of parasites?				
3.6 Where treatments have been administered is this done in	Medium	Y	4.3.82, 5.3.51	
accordance with principles to maximise the effectiveness of				
treatments, promote the minimal use of medicines consistent with the				
maintenance of high standards of fish welfare and help preserve their				
efficacy?				
For example, the principles of ISLM include:				
Resistance monitoring – reporting suspected adverse drug event				
(SADE) to the VMD. The steps to determine if resistance is considered a reason for a				
suspected lack of efficacy (e.g. Bio-assay tests and results, seeking				
veterinary advice)				
Appropriate discharge consent in place				
Use of authorized medicines with veterinary instruction and advice as				
necessary				
Monitoring lice numbers				
Using an array of treatments where possible				
Treating all stocks on site at the same time				
Avoiding the simultaneous use of different active ingredients Avoiding consecutive treatments of the same active ingredient, and				
certainly not on the same cohort of lice				
Routine removal of moribund fish and regular removal of mortalities.				
3.7 Are weekly monitoring results communicated to other farmers	High	Y	CoGP 4.3.78, 5.3.47	
within the defined area?				
3.8 Is this done 'as soon as reasonably possible where lice numbers	High	Y	CoGP 4.3.79, 5.3.48	
exceed the suggested criteria for treatment?				
3.9 Is sea lice data and other information relevant to the management	Low	Y	CoGP 4.3.80, 5.3.49	
of sea lice provided to the SSPO?				
3.10 Are annual review meetings held by FMA groups to evaluate site	High	Y	CoGP 4.3.83, 5.3.52	
performance against set criteria?				

Point for consideration	Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary
3.11 Is there a signed documented farm management agreement or		Y	AFSA ¹³ 4A	
farm management statement relevant to the site and CoGP Farm				
Management Area (or equivalent)?			Detail if necessary:	
3.12 Are up to date copies of FMS available from other APB operating	Medium	Y	CoGP 4.3.88, 5.3.57	
within the same FMA?				
3.13 Are significant changes to FMS notified to other companies	Medium	Y	CoGP 4.3.89, 5.3.58	
within the FMA?			ŕ	
3.14 Is there co-operation between APB's operating within the FMA in	Medium	Y	CoGP 4.3.90, 5.3.59	
the development and implementation of FMAg?				
3.15 Are copies of FMS or FMAg available for inspection?	Medium	Y	AFSA 4B	
3.16 Does the FMS or FMAg take into account the relevant aspects	Medium	Y	CoGP 4.3.91, 5.3.60	
regarding a sea lice control strategy?				
3.17 If the FMA has been redefined, is there documented evidence	High ¹⁰	Y	CoGP 4.3.92, 5.3.61	
to demonstrate that the risks to health within and outwith the area is	J			
not increased by the proposal?				
3.18 Is the CoGP Farm Management Area (or equivalent) fallowed	High	Ν	CoGP 4.3.100	Lober is not on same stocking plan as other SSF sites. Plan to bring in
synchronously on a single year class basis?				line but not definite date. Not coordinated with Cooke
3.19 If answered no to 3.18, then is there a documented risk	High	Y	CoGP 4.3.101	
assessment which meets the requirements of CoGP point 4.3.101?				
d. Inspection of records relating to training and procedures				
4.1 Is there a training programme or plan in place relevant to sea lice	High	Υ	CoGP 7.1.8	class room training with Fish health and welfare manager and on site
control for the site?				training. SVQ (NEFC training Aquaculture modern apprentiship start
				with level 1 and level 2 and managers continue to level 4) system also
				in place. Fish health modules. Part of LANTA system.
4.2 Are training records available for relevant staff in relation to:			CoGP 4.1.6, 5.1.6	
			SSI, 1,1	
parasite identification	High	Y	CoGP 4.3.84-86,	
counting parasites (procedures for)	High	Y	5.3.53-55	
recording counts	High	Y		
biology and life cycle of parasites	Low	Y		
symptoms of parasite infection in fish	Low	Y		
4.3 Have staff been trained in the administration of treatments?	High	Y	CoGP 4.1.6, 5.1.6	
			CoGP 4.3.84, 5.3.53	
N.B. there is no legal requirement to maintain a record of this				
Where reports evist reporting SODs and site presedures these				
Where records exist regarding SOPs and site procedures these should be inspected to confirm suitability				
e. Inspection of site and site stock				
5.1 Are medicines used, stored and disposed of safely?	Medium	V	VMD schedule 5	
5.1 Are medicines used, stored and disposed of safety? 5.2 Do the sea lice levels observed on stocks reflect sea lice count	High	1 V	VIVID Schedule 5	
data?	ngn	1		
Refer to section e) of guidance notes				
Refer to section e) of guidance notes				

Point for consideration	Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary
5.3 Does the site appear satisfactory in terms of fish welfare relating to sea lice infestation?	High	Y		
f. Inspection of farm count procedures				
6.1 Are pens and fish sampled at random?	Low	Ν	CoGP Annex 6,	Do every pen every week weather permitting at 10 fish level. Fish sampled ramdomly.
6.2 Have the personnel conducting counts had appropriate training in lice recognition and recording?	High	Y	4.3.84-86, 5.3.53-55	
(Cross reference to training records – Section d)				
6.3 Can such personnel demonstrate post training competence?	High	Y	CoGP 4.3.85, 5.3.54	
6.4 Do the sample sizes and methods of sampling match the CoGP suggested protocol (detailed iii – vii)?	Medium	Y	Annex 6	exceed at every pen at 10 fish
N.B. Other strategies are acceptable if considered adequate in the control and reduction of sea lice			1	
6.5 Is identification and recording of sea lice count information including species and stages observed to be correct? Minimum recording requirements within the CoGP and NTS are:	High	Y	Annex 6	
for Caligus elongatus all identifiable stages and for Lepeophtheirus salmonis chalimus, mobiles and adult females (with or without egg strings) ¹¹				
6.6 Is the transfer of data from field counts to records observed to be satisfactory?	Medium	Y	1	Dedicated heath specialist will transfer the date from sheet into fishtalk Input on return to barge. If internet issues on barge shared with Fish health and welfare manager for input.
g. Inspection of treatment administration procedures				
7.1 Are treatments considered to be administered in an appropriate competent manner?	High	N/A		
Consider appropriate use of tarpaulins; completion of medication per prescription, correct concentrations, mixing and administrations, appropriate product used			1	
7.2 Is accurate information provided to the attending veterinary surgeon for dosage calculation?	High	N/A	CoGP 4.3.131, 5.3.85	
7.3 Are the fish under consideration being given any other medication, or are they in a withdrawal period for any other medication?		N/A	1	
7.4 If so, has the prescribing veterinary surgeon been informed of this?	Medium	N/A	CoGP 4.3.132, 5.3.86	
7.5 Are clear instructions for medication, dosage and administration communicated to the staff responsible for treatment?	High	N/A	CoGP 4.3.133, 5.3.87	

Additional actions	Powers	Comments and advice given or action taken if necessary

Point for consideration	Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary
 h. FHI sea lice counts If necessary conduct a sea lice count in accordance with the protocol of the CoGP. Indicate where this procedure has been done and make a record of results within the comments box 	Power granted under the Act – section 3 (2) (a)			
 i. Collection of samples If necessary collect samples. Indicate if samples have been taken and detail what those samples are and the purpose of their collection 	Power granted under the Act – section 3 (3) (a)			
j. Enforcement Notice. If an enforcement notice has been issued then maintain a copy / duplicate and record detail Guidance on completing the Enforcement Notice	Power granted under the Act – Section 6 (2)			

[1] Scottish Statutory Instrument – The Fish Farming Businesses (Record Keeping) (Scotland) Order 2008

[2] A Code of Good Practice for Scottish Finfish Aquaculture

[3] Water temperature to be measured at the half way point of the depth of the facility containing the fish, or as close to as possible. For SW cage sites one reading per count may be s

[4] Recording requirements:- for C. elongatus - all identifiable stages and for L. salmonis - mobiles and adult females (with or without egg strings)

[5] Area refers to management area as specified within Part 3 of the industry CoGP or as redefined appropriately

[6] For reference Annex 6 of the CoGP provides the detail of the NTS

[7] FMA = Farm Management Area

[8] FMS = Farm Management Statement

[9] FMAg = Farm Management Agreement

[10] No further action may be required when answering no to this point and yes to 3.18

[11] Legal recording requirements within the SSI stipulate – for Caligus elongatus: mobiles; and for Lepeophtheirus salmonis: non-gravid mobiles and gravid females.

[12] VMD - The Veterinary Medicines Regulations 2013 (SI 2013 No 2033)

[13] AFSA - Aquaculture and Fisheries (Scotland) Act 2007 (as amended)

 CASE NO
 20250016

DATE OF VISIT 05/02/2025 SITE NAME Lober Rock (SMH) INSPECTOR

While visiting Lober Rock (SMH) for a routine inspection site staff reported observing "fungus" on the sea lice. Samples of sea lice were collected in 100% ethanol for diagnostic examination.

Fifteen sea lice were present, 14 were morphologically identified as *Lepeophtheirus salmonis* with one chalimus, several pre-adults, adults and two gravid females stages being observed. One *Caligus elongatus* adult female was also present.

All individuals were observed to have adult monogenean parasites attached, with young and eggs also present, concentrated on the rear of the cephalothorax and genital segment. Several were also present loose in the tube. On removing an individual for microscopical examination, worms were morphometrically consistent with *Udonella* sp. hyperparasite, likely *U. caligorum*.

Please contact myself or the duty inspector should you require any further information, have any queries regarding this report.

ENHANCED SEA LICE INSPECTION

An enhanced sea lice inspection to ascertain the levels of sea lice and for assessing the measures in place for the prevention, control and reduction of sea lice was conducted in accordance with the Aquaculture and Fisheries (Scotland) Act 2007.

The visit consisted of an inspection of records with regards to sea lice, the stock on site and site procedures with regards to sea lice.

a) Inspection of sea lice records

The site meets the requirement of current Scottish industry best practice. There were no recommendations made and no further action is required.

b) Inspection of records relating to treatment and control of sea lice

The site meets the requirement of current Scottish industry best practice. There were no recommendations made and no further action is required.

c) Inspection of records relating to farm management groups and area management agreements.

The site meets the requirement of current Scottish industry best practice. No recommendations made and no further action is required.

d) Inspection of records relating to training and procedures

The site meets the requirement of current Scottish industry best practice. No recommendations made or further action required.

e) Inspection of site and site stock

The site meets the requirement of current Scottish industry best practice. No recommendations made or further action required.

f) Inspection of farm count procedures

An inspection of site staff conducting and recording a sea lice count was carried out. This met the requirements of The Fish Farming Business (Record Keeping) (Scotland) Order 2008 and CoGP. No further recommendations or further action required.

g) Inspection of treatment administration procedures

Procedures were not inspected as a treatment was not taking place at the time of inspection. However, discussions on procedures with the company correspondent would suggest that the site meets the requirement of current Scottish industry best practice.

Further Action

The site meets the requirement of current Scottish industry best practice. No further recommendations are made, or further action required.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

DATE OF VISIT 05/02/2025 SITE NAME Lober Rock (SMH)

Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009. However samples were taken of sea lice with what was described as "fungus" for diagnostic purposes. A separate report will be issued detailing the results of these tests.

Records

The surveillance frequency category of the site was assessed as medium. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted every second year. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Records in relation to aquaculture animals transported by the business were inspected and found to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

Mortality levels had exceeded the reporting criteria since the last inspection and had been reported to the Fish Health Inspectorate as required.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Directorate were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Medicine records were inspected and found to be adequately maintained.

Samples were taken to be analysed for veterinary residues.

Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007, as amended, with respect to section 3 regarding parasites (sea lice), section 4A regarding fish farm management agreements and statements and section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory with regards to fish farm management agreements and statements and containment and escapes.

An enhanced sea lice inspection was conducted. A separate report will be issued in due course.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.
