Additional Case Information:

Paperwork inspection completed on 04/06/2025.

All mortalities from Cooke taken to Kirkwall shorebase, then transferred to Dounby (near Kirkwall) for bulk uplift to Shetland.

FLS treatment carried out in May 2025. Slice treatment in January 2025.

Farm management area is not fallowed synchronously as it includes both Cooke and Scottish Sea Farm sites.

During the site inspection the fish were observed shoaling deep in the water column. No dead fish or moribunds were seen across the whole site. Very low levels of sea lice observed during counts. The fish sampled for the VMD appeared healthy both internally and externally.
