Additional Case Information:

Site have seen an increase of numbers in the jellyfish (Species - comb and gooseberry jellyfish). Due to this fish have had limited feeding, this decision was made with veterinary advice.

Health report from 04/07/2025 that 5 out of 20 fish had low to moderate AGD. Site had suggested the presence of AGD is due to the increase number of jellyfish.

Wrasse mortality records from previous cycle were checked and were satisfactory.

At the time of inspection sea lice counts were observed. Sea counts are reflective of what has been reported and were found to be satisfactory.

Whilst inspecting sealice records it was noted that in the previous cycle sealice counts were over the threshold and had been reported to the the FHI accurately. In the current cycle sealice counts have been below the threshold.

Fish were observed on site and via feed cameras, they were shoaling and swimming well in deep in the water column. The fish had a good feed and stimuli response. 1 moribund was removed at time of inspection. No gross pathology was observed so no samples were collected. 3 fish with spinal deformities were observed across site. It was observed that there were a high number of jellyfish (Species - comb and gooseberry jellyfish) across site.

FISH HEALTH INSPECTORATE VISIT REPORT

SUMMARY FOR INFORMATION OF SITE OPERATOR

 BUSINESS NO
 FB0125
 DATE OF VISIT
 09/07/2025

 SITE NO
 FS0903
 SITE NAME
 Swining Voe 3

 CASE NO
 20250247
 INSPECTOR

Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

Records

The surveillance frequency category of the site was assessed as medium. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted every second year. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and found to be inadequately maintained.

Records in relation to aquaculture animals transported by the business were inspected and found to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

Mortality levels had exceeded the reporting criteria since the last inspection and had been reported to the Fish Health Inspectorate as required.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Directorate were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

The following points were raised with the site representative during the inspection:

 Site FS numbers and stock quantities had not been recorded during movements within the movement records. Site was reminded to input information correctly into the movement records. No further action required.

Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Medicine records were inspected and found to be adequately maintained.

Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007, as amended, with respect to section 3 regarding parasites (sea lice), section 4A regarding fish farm management agreements and statements and section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory with regards to parasites, fish farm management agreements and statements and containment and escapes

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Signed:

Fish Health Inspector

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Scottish Government website at Fish Health Inspectorate Service Charter - gov.scot (www.gov.scot)

Date: 16/07/2025
