UNI/REG only - if unable to carry out intended visit detail reason below:						
Site fallow. Inspection to deregister.						

Additional Case Information:

Site is in disrepair and is clearly not currently being operated. The site is owned by the University of Stirling and has been up for sale for several months. The tanks on the site have been drained and are empty with no stock. Many of the facilities are damaged including tanks and supplying pipework.

The site is to be deregistered. Aqualife Services Ltd were liquidated and the movement records were collected by the insolvency company and so were not available. This will not be raised as an issue as the sites are being deregistered and are no longer stocked or operational.

Fish Health Inspectorate visit report

Summary for information of site operator

Business no:	FB0573	Date of visit:	21/10/2025
Site no:	FS0833	Site name:	Milnholm Smolt Unit
Case no:	20250382	Inspector:	[REDACTED]

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

On this occasion, the site was found to be fallow. The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated.

Due to the liquidation of the business, aquaculture animal and aquaculture animal product movement records and mortality records were not available for inspection, as these were collected by the insolvency company. No further action will be taken in this instance as the site is being deregistered.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.
