Additional Case Information:

Mortality, treatment, sea lice records along with health surveillance results and the farm management statement were inspected remotely on 24/03/2026 by [REDACTED].

Fish on site appeared in good condition with only a small number showing minimal damage to the snout. Only 1 lethargic fish observed across all 9 stocked pens but responded to presence and wasn't showing any signs of disease.

1 fish removed for VMD sampling and was in good condition both internally and externally.

Sea lice count and gill checks witnessed with the sea lice counted matching recently reported AF lice levels.
