Business No: FB0119 Business Name: Mowi Scotland Ltd

Case Types: 1 REP 2 REG 3 VMD 4 5 6

Water Temp (°C): see additional ir Thermometer No: Site FHI 045 completed Y

Observations: Region: HI Water type: F CoGP MA:

Dead/weak/abnormally behaving fish present?	Y	If yes, see additional information/clinical score sheet.
Clinical signs of disease observed?	N	If yes, see additional information/clinical score sheet.
Post mortem signs observed?	N/A	If yes, see additional information/clinical score sheet.
Diagnostic samples taken?	N	

UNI/REG only - if unable to carry out intended visit detail reason below:

Additional Case Information:

Temps in Hatchery A 5.9, Hatchery B 6.3, Hatchery C 7. Temp in Fry Unit A 12.5, Fry B 12.9. temp in smolt unit A 14.9, Smolt unit B 14.6.

Water is being chilled as river intake is 19 degrees currently. Temperatures are calibrated against a scientific, certified mercury thermometer, digital probes are calibrated against this. The mercury thermometer is replaced every year.

Ova morts for last 2 weeks (only stocked 24th July) wk 31 12567 (0.47%), wk 32 56043 (1.05%), this weeks may be around 5% due to failed hatch. Two recent inputs received from Aquagen Barstadvik.

Fry morts last for wk 29 46489 (1.08%), wk 30 72669 (1.71%), wk 31 17031 (0.41%), wk 32 11415 (0.27%). Post transfer, touch of fungus treated with formalin and bronopol.

Smolt A (Q4 parr) Wk 29 1060 (0.04%), wk 30 801 (0.03%), wk 31 1747 (0.06%), wk 32 7386 (0.25%) Nephrocalcinosis.

Smolt B (Q3 parr 2026) Mortality issues in this stock started in wk 27, samples were taken (histo, PCR, water chemistry analysis and bloods, gas bubble disease was identified. In wk 28 supersaturation was identified as the cause, this was from a loose flange on an oxygen injection vessel caused by vibration loosening bolts. It was not a known issue but procedures have been put in place to ensure all bolts are checked annually. Secondary issue was due to post recovery from gas bubble disease. A lack of calcium hardness in the water led to ionic imbalances leading to a secondary acute mortality event due to low blood chloride levels, calcium hydroxide (nutralac) was used to treat the water and stabilised the gills and mortalities dropped within 48 hours to 50 per day, mortalities are now stable.

Morts wk 26 1555 (0.08%), wk 27 10088 (0.49%), wk 28 102412 (5.01%), wk 29 148195 (7.63%), wk 30 167922 (9.36%), wk 31 843 (0.05%), wk 32 1005 (0.06%) this recent increase in wk 32 was due to handling and vaccination.

Water analysis sample results show that the calcium levels were low, histo identified nephrocalcinosis and gas bubble disease. PCR identified IPN but this was post vaccination.

On inspection of the site no issues were noted, fish were shoaling and feeding well. Two tanks had just been vaccinated and had been through a post vaccine treatment with formalin and cress.

It was noted that the mortality notifications submitted to the FHI do not match the site records. This was discussed with the manager and it will be raised with the business.

Mean Fish Wt	N/A	1.36g	21.66g	66g			
Next Fallow Date (Site)		Ongoing cycle but units		Next Input Date (Site)		Dec 2026	
Recent (last 4 wks) disease problems?			Y	Any escapes (since last visit)?			N
If yes, detail:	Gas bubble disease, saprolegnia, nephrocalcinosis						

Movement Records

1. Movement records for **all species** held available for inspection?	Y
2. Date of last inspection:	18/05/2026
3. Are records complete and correctly entered?	Y
4. Are movement records available for dead fish and waste?	Y
5. Are records complete and correctly entered?	Y
6. Have all introductions and imports (since last inspection) from outwith the GB health zone been recorded in the movement records?	Y

Transport Records

1. Are any movements carried out not using a STB (by (or on behalf of) the business)?	
If yes, is there a system in place for maintenance of transportation records?	

Mortality Records

1. Mortality records for **all species** held available for inspection?	Y
2. How are mortalities disposed of?	Incinerated - on site
If other detail:	Larger numbers uplifted, most recent ones were and went to Barkip.
3. Mortality records complete and correctly entered?	Y
4. Recent mortality (last 4 wks):	see additional information
5. Evidence of recent increased/atypical mortalities?	Y

If yes, facility nos/no mortality per facility/no stock per facility/reason:

see additional information

6. Any other peaks in mortality during period checked?	N
If yes, detail:	
7. Have increased (unexplained) mortalities been reported to vet or FHI?	N/A
If yes, detail action:	
8. Have 'mortality events' been reported to FHI? If no, enter details on mortality events sheet.	Y

Treatments and Medicines Records

1. Recent treatments (see comment)?							Y
If yes, detail:	Formalin	Cress	T.M.S.				
If other, detail:	Alphaject Micro 6 and Alphaject PD1, Ridgeway pasteurella Skyensis, Yersinia/moritella, Livac (Alphaject SRS Livac)						
2. Medicines records available for inspection?							Y
3. Are records complete and correctly entered?							Y
4. Are fish in a withdrawal period?							Y
5. If yes, what treatment(s)?			Formalin	Cress			
If other, detail:	Alphaject Micro 6 and Alphaject PD1, Ridgeway pasteurella Skyensis, Yersinia/moritella, Livac (Alphaject SRS Livac)						
6. Are medicines stored appropriately?							Y

Biosecurity Records

1. Biosecurity records available for inspection?	
2. Has the manner and frequency of mortality removal, recording and safe disposal been considered?	
3. Has the manner and period in which the APB will notify Scottish Ministers or veterinary professional of any *increased* (*unexplained)* mortality at the site been included?	
4. Has the action that will be taken in the event that the presence or suspicion of the presence of a listed disease is detected been included and *how* and *when* that will be notified to Scottish Ministers?	
5. Has the health status of aquaculture animals being stocked on the farm site been covered (equal or higher health status, certification if required)?	
6. Have the husbandry and biosecurity measures implemented between each epidemiological unit to minimise transmission of disease been covered (movement of staff, visitors, equipment, live or dead fish etc.)?	
7. Is documentation available regarding the measures in place to maintain the physical containment of aquaculture animals held on site?	
8. Have the biosecurity procedures been adequately implemented on site?	
If no, detail:	

Results of Surveillance

1. Has any animal health surveillance been carried out by, or on behalf of, the business?	Y
2. If yes, are results available for inspection?	Y
3. Any significant results?	Y
If yes, detail (if not detailed under recent disease problems).	as detailed above

Fish Health Inspectorate visit report

Summary for information of site operator

Business no:	FB0119	Date of visit:	11/08/2026
Site no:	FS0226	Site name:	Inchmore
Case no:	20260270	Inspector:	[redacted]

Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected in accordance with the Aquatic Animal Health (Scotland) Regulations 2009, following the notification of elevated mortality.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

Records

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated.

The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Scotland were available for inspection.

Mortality levels had exceeded the reporting criteria since the last inspection and had been reported to the Fish Health Inspectorate as required however, some discrepancies were noted.

The business has been contacted to clarify the issue. No further action required.
