

# FF4

QUICK CHANGE FLOOD FEEDER

PH

PHARMA

## > Satisfying today's production line demands

The FF4 is a quick change flood feeder designed for larger format blister machines. The stirring assemblies have adjustments for height and both the brushes and stirring assemblies are speed adjustable. The system is designed for quick change-over and the integrated lift feature allows it to be removed from the guide track quickly and easily.

### FEATURES AND BENEFITS

- cGMP design
- Quick change of paddles and brushes
- Three stirring assemblies with easy adjustments for speed and height
- Configure brush and stirring assemblies in any order to maximize feeding efficiency
- Mobile cart for quick docking to TF2, TF3 and other brand blister machines
- Can be mounted directly to machine frames if required
- BV4 system can be directly integrated or remain independent
- The FF4 can be adapted to other medium to large format size blister machines

## FF4 SPECIFICATIONS

|   |                           |
|---|---------------------------|
| Max. feed area width (across machine)         | 301 mm                    |
| Max. feed area length (index direction)       | 823 mm                    |
| Format change part (for changes in web width) | 2 inserts (Hard coat Al.) |

## BV4

### BULK VIBRATORY SYSTEM

The BV4 is the preferred Bulk Vibratory System for medium to large feeding applications. The unit can be changed over without the use of tools. It can be mounted to a mobile cart so that it can be used with multiple different feeding systems or it can be mounted directly to a feeder system platform.

#### FEATURES AND BENEFITS

- cGMP design
- 316 SS hopper with viewing window
- Quick change sieve plate
- Compact design for smaller feeder systems
- Used with TF2, TF3 and any other small to medium format blister machines including UPS4 blister machines
