

# Marketing On- and Offline (m/f)

Internship/ Working Student

## About Us

ThinXNet is a young company from Munich, living the Internet of Things vision. With our product TankTaler, we're able to connect cars with the internet in a simple and fast way. Given our system, consisting of a hardware plug and a smartphone app, customers can get mobile access to relevant on-board information of their automobiles, pay at the gas station with just one click on their smartphone (beta) – without lining up in the shop – and much more. In addition, consumers collect TankTaler automatically. Later on, these bonus points can be converted to premiums. Our long-term goal is to create a completely new mobility experience within the connected car and furthermore making vehicles smarter than ever before.

For our fast-growing, Venture Capital funded Start-Up, we're looking for highly motivated support in our Marketing team, starting in Munich from now. If you're a proactive person, who loves to inspire people and share our passion for *Internet of Things*, then you're just right at ThinXNet!

## What is my role?

- You will develop marketing & communication strategies across all online & offline channels
- You will implement those strategies and manage daily business
- You will have the chance to bring new ideas to the table and shape the business

## Which qualifications do I need?

- You are enthusiastic, outgoing and passionate on your work
- You are currently studying on Bachelor or Master level
- You ideally have previous internships and experience in marketing context
- You have excellent English and German communication skills (written and verbal)

## What do we offer?

- You will work in a space (connected cars) that will completely shift the weights in the billion \$ automotive industry
- You will work directly with the founders of the company, learn from their experience and breathe the start-up feeling
- You will take responsibility right from the start and work on your own projects

## Ready to revolutionize the automotive industry?

Then submit your CV and a short note why and when you want to join us to [jobs@thinxnet.com](mailto:jobs@thinxnet.com). If you have any questions, feel free to give us a call or just stop by at our office. We really look forward to getting to know you!
