

GENERAL DISCLAIMER

Please read [important legal disclosures](#) that apply to your relationship with Avenue Securities LLC.

Online trading has inherent risk due to system response, execution price, speed, liquidity, market data and access times that may vary due to market conditions, system performance, market volatility, size and type of order and other factors. An investor should understand these and additional risks before trading.

The information provided is not warranted as to completeness or accuracy and is subject to change without notice. The information provided should not be considered legal or tax advice. Consult an attorney or tax professional regarding your specific situation. The projections or other information regarding the likelihood of various investment outcomes are hypothetical in nature, are not guaranteed for accuracy or completeness, do not reflect actual investment results and are not guarantees of future results. All investments involve risk, losses may exceed the principal invested, and the past performance of a security, industry, sector, market, or financial product does not guarantee future results or returns. Consider the investment objectives, risks, charges, and expenses of a fund before investing. Contact us for a prospectus containing this information.

Investors should consider the investment objectives, risks, and charges and expenses of a mutual fund or Exchange Traded Fund ("ETF") carefully before investing. Before investing in any mutual fund or ETF, you should consider its investment objective, risks, charges and expenses. Contact us at customer@avenue.us for a prospectus, offering circular or, if available, a summary prospectus containing this information. Read it carefully. ETFs are subject to market fluctuation and the risks of their underlying investments. ETFs are subject to management fees and other expenses. Unlike mutual funds, ETF shares are bought and sold at market price, which may be higher or lower than their NAV, and are not individually redeemed from the fund. Investment

returns will fluctuate and are subject to market volatility, so that an investor's shares, when redeemed or sold, may be worth more or less than their original cost. ETFs are subject to risks similar to those of stocks. Some specialized exchange-traded funds can be subject to additional market risks. Leveraged and inverse exchange-traded products are not designed for buy and hold investors or investors who do not intend to manage their investment on a daily basis. These products are for sophisticated investors who understand their risks (including the effect of daily compounding of leveraged investment results), and who intend to actively monitor and manage their investments on a daily basis.

Securities products and services offered to self-directed investors through Avenue Securities LLC Member [FINRA](#)/ [SIPC](#).

Securities products are: Not FDIC insured · Not bank guaranteed · May lose value
