

# INTAKA ISLAND EDUCATION ACTIVITIES

## FUN FOR ALL

### POND DIPPING

**Topic:** Water - Things that live in the water

**Activity:** Learners get taken through the concept that water is required for life, but within water there is also life. Learners will then collect their own samples from our pond dipping area and then proceed to our outdoor classroom where they will explore the creepy crawlies in the water with hand lenses and with assisted microscope slides.

### WATER PURIFICATION

**Topic:** Water - Recycling  
**Healthy environment** - The importance of a clean environment, ways in which people pollute it and the importance of recycling

**Activity:** Learners will be taken through the Sustainability Classroom to learn how Intaka keeps its environment healthy. They will get to build their own sand filters with materials found on the Island and put them to the test.

### BASICS ABOUT BIRDS

**Topic:** Birds

**Activity:** This lesson covers an informative discussion on the general characteristics of a bird - feathers, beak, lays eggs, etc. Each learner will be given a set of binoculars and a bird identification sheet. They will be taken to one of the bird hides on the Island to identify some of the birds that are found on the Island, as well as have a closer look at the different nest different birds make.
