

# INTAKA ISLAND EDUCATION ACTIVITIES

## GRADE 1

### WEATHER WISE

**Topic:** **Weather** - What the sky looks like on different days depends on the weather  
**Seasons** - How and why they occur

**Activity:** Learners will investigate what the weather is like at Intaka Island on the specific day of their visit. They will be taken to an outdoor classroom to identify and experience all the different factors that contribute to weather. They will also learn how to read a weather chart and what all the symbols mean.

### PLANT PARADISE

**Topic:** Plants, seeds and where they come from and what plants need in order to grow

**Activity:** Learners will be taken to an outdoor classroom where they will identify some of the plants that are found on Intaka Island. They will then collect some samples of plants to help them identify the different parts of a plant. In groups they will also discuss the importance of plants and what plants need in order to grow.

### WATER PURIFICATION

**Topic:** **Water** - Recycling  
**Healthy environment** - The importance of a clean environment, ways in which people pollute it and the importance of recycling

**Activity:** Learners will be taken to the Sustainability Classroom to learn how Intaka keeps its environment healthy. They will get to build their own sand filters with materials found on the Island and put them to the test.
