

INTAKA ISLAND EDUCATION ACTIVITIES

GRADE 3

INCREDIBLE INSECTS

Topic: **Insects** - Characteristics of an insect. Observing and drawing some of the different insects on the island. How insects can help or harm us

Activity: This activity covers a thorough introduction on what insects are and their different properties. Learners will then go out and search for some of the insects found on Intaka Island in the form of pictures. Interesting facts about each insect will be given as well as how they are important to us or how they can harm us. Learners will then, in groups, complete a worksheet using their knowledge on insects.

READY TO RE-USE, REDUCE AND RECYCLE

Topic: **Sorting and recycling**

Activity: Learners will be taken to the Sustainability Classroom to see how Intaka re-uses, reduces and recycles. They will have to pay close attention in order to complete a worksheet. The activity will end off with a game where teams compete to see who can recycle the best.

LOVELY LIFE CYCLE

Topic: **Life cycles** - What a life cycle is, life cycle of mammals, insects, amphibians and birds

Activity: Learners will receive a quick introduction on what life cycles are before they go out on the wetlands to search for some of the organisms that are found on Intaka Island in the form of pictures. The life cycle of each organism will be explained to them and they will then, in groups, put together the pieces of a puzzle to complete the life cycles of various animals and plants.
