

# INTAKA ISLAND EDUCATION ACTIVITIES

## GRADE 9

### READY FOR RENEWABLE

**Topic:**

Electricity, renewable ways to generate electricity

**Activity:**

A quick introduction on where electricity comes from before learners will look at different house hold appliances and calculate the amount of electricity it uses. The negative impact on the environment will be discussed and learners will investigate renewable ways to generate electricity that Intaka Island is currently using.

### FUN WITH FOOD WEBS

**Topic:**

Differences between plant and animal cells

**Activity:**

Learners will investigate the differences between plant and animal cells through the eye of a microscope. They will then make a labelled diagram of each plus tabulate the differences between them
