Angel Band: condition of little man coming into the supernal

Come let us go back to God (Sam Cooke): the earth in its strain is bringing you back into position that you can thrive as God.

Keyhole, Myosin / Meissen Bob on Mantle

Latch, lock, key and keyhole: **watch perspective to gate that doesn't open**, that gate could become a keyhole to a lock to turn on lotus flower.

| the non-gate in angel diagram

Living carbon is keyhole CH14 is opened by.

Is chromosome 14 a lock?

Key.

Carbon activates the keyhole.

| this needs cleanup. How can carbon be keyhole and activate keyhole.

| Is CH 14 the door then?

What is Meissen? Fine paste porcelain.

Carolyn: **Myosin as family of motor proteins, molecular motor (for muscle contraction).**

iON: Both apply. One is esoteric, one is conditional. One how you apply, one how you see it.

Myosin: It's the third amino acid, has to do with the lock.

Myosin / Meissen: One is continual, one is continuum.

There's nothing outside the grimoire.

iON says JW had a fight in the "heavenlies" over the grimoire. Almost took JW out.

You have no idea what the heavenlies are.

Heavenly appointment and heavenly agenda and heavenly compendium.

JW was standing on the word.

He took a stand based on the Word of God in the scriptures. He knew they apply and would not be tempted to doubt them.

18m

3 amino acids.

Meissen is hard paste porcelain.

Carolyn: Key 13 ZIP/ZIM

She knows because she's done them all. She knew what the condition was and she responded; lined them up. The dial-a-mile, Carolyn is good at it because she knows how it connects.

Myosin: contracts muscles. **Meissen: our exoskeleton is becoming hard like porcelain.**

Run your fingernail above your ear and gunk comes off.

Appears above eyebrows, in and around ears, elbows. Exoskeleton getting rid of dermis.

Skin will be initially NASO2

Bert's skin sparkling is exodermis shifting. Eg. Twilight series. Vampires sparkle in the light.

Lock and chromosome 14: has something to do with valence / valance.

That's the ring you would seal. Seal the outside. Seal the valence, then you control the valance.

Like a zygote sealing.

24m

Endocannabinoids: lipid-based neurotransmitters that mock ambient yeast in air.

Will lipid based neurotransmitters switch from mocking yeast to mocking leptose?

No, they shift.

Candida becoming less and less of a thing.

Leptose is radioactive, but it's not mold. Radioactiveness is fleeting.

Half life becoming receptively embraced as normal.

iON just connected leptose to half life, but it's leaning more towards AL2SO4.

Condition is the new environment that you're coming into. If you can't live inside it you will die.

You file a position and adjust accordingly to say "this is the state of the union",

Or this is the status you're going to have a union regarding. Then you're in a compendium you can apply. The application is what we're trying to set in the human genome.

We're trying to apply the changing environment to the human genome.

We're trying to encourage everyone to come into a place of their power so they can come into the Holy of Holies.

Endocannabinoid System

@Chad

20230128 PayDay: Much talk of endocannabinoid system in relation to the multiverse. Also said "Carolyn would say ECS mocks ambient yeast."

- 20230211 PayDay Bob's private session: Ambient yeast. Yeast in body is the constant. Cloud is also constant. So, does ambient yeast mirror cloud inside the meat sack?
iON: No, it mocks it.

ambient yeast mocks the cloud inside the meat sack.

Carolyn will be interested in this because it sets another point of order that's been addressed, like why it is 43 degrees in Myrtle Beach tonight.

Endocannabinoid system part of p-brane, has a lot to do with hidden dimensions.

Hidden dimension: like the cosine that lags behind. Like the car that ran you over, you just didn't notice—that's the interval that would set you outside of that capacity.

Eg. Everyone complaining about shit that's not real. That's the interval that you experienced but it was instant—most peoples' depravities last years.

If your leg gets cut off, the constant reality is that you're legless but you still scratch the nub because foot itches. Because reality doesn't accept you without a limb. But you can create a new limb.

Because the ECS is part of the p-brane, and you've said "it's how you adjust at a moments notice" **is ECS what allowed me to flip back to the cosine / before the car hit?**

iON: Yes. You would have an experience before it could be your experience.

41m

58m

@Chad

iON had said: we talked about keys and aethyrs (tumblers) but you haven't asked about the keyhole. Y'all gotta have the keys to the kingdom, but where is the lock?

On last WY iON confirmed that the keyhole is in the door to the holy of holies.

Is that what the 19th key is for – to open the door to the Holy of Holies?

| answered below by Carolyn

Bert: I have no notes on the 19th key.

iON: **Carolyn opened the 19th key a month ago before the tsunami.**

iON won't tell us what it does.

2000h

Does the door to the Holy of Holies take us out of the Hologrammy?

It will seat you into the hologrammy. You're in it now, but not seated.

Bob got mantle from Moses because he was a murderer so he didn't qualify for the Top 10 and had to forfeit his mantle to Ophanelle.

Once we open the door to the Holy of Holies, does that take us out of the hologrammy?

Yes. Because we're in our power. It's the conjugation: and, but and or.

Connection between hologrammic and Holeopathic computer satellite into Holeopathic satellite squared. That's the difference between "I'm here" and "I'm on my way."

Look at the Tiny Note chart! If you don't know chart, you don't know the difference between Monad, Dyad—

Kroker is a buffer against the Thompson Quadrant. Which brings you into orpheus tetradic consciousness.

Trying to merge them into one synesthesia.

Bob: Switch away from sensuous facts to effects you highlight such the axis that the 2d in visual is in effect very tactile, resonant, auditory—Lewis' tactile eye. 3D remains visual, pictorial, retinal, abstract, non-retinal (tactile, resonant, auditory) is not in retinal. —MM

Discusses in Cameron dialog # 70. 2D includes the other senses. Most don't think of visual space as auditory.

Eye when 3D is isolated. 2D is tactile eye.

44m

@Chad

Meissen Bob almost seated on mantle: little head that bobbles; floating a bit above the mantle.

Re: Being seated in the hologrammy?

Before we're SEATED in hologrammy, are we just floating in the hologrammy?

Vessels of tabernacle are what we engage on the show.

7th seal, 7th thunder with regard to the tabernacle. Silence in space of hour. Thunder is angel crying out. Sickle.

before we're seated in the hologrammy, we are in the tabernacle.

Silence = "Code silent sequence" when the cloud was rolled out.

Susana: is tabernacle chromosome 14?

No but it's included in it.

Mr. French from A Family Affair

55m

Hologrammy: **When we become seated in tabernacle. It's the registration for marriage supper of lamb.** Once you pass 420 elders. Your blood completely changed.

JW's blood. No longer RH negative. Increased red blood cells change his spinal fluid which changes synovial fluid.

Now AI is getting capacity to tell what condition your condition is in.
But we say you gotta know it in your knower.

If you're in your power, then you're in the tabernacle. Then you have to bring that out otherwise you're floating trying to land your place of power.

Key 19

If you're floating, which key and aethyr?

When you're in the tabernacle, seated, that's key 19.

Carolyn applied it to herself.

2100 h

Cations, Anions and Antimatter

8m

@Bert

Cations and anions

Lampstands and anions.

Changing environment causing changing from cations to anions. Increased ionization is responsible.

That's why Sheila made so much money on her paintings, because she represented the cations and anions.

Make it real for you or else it won't last long. If it doesn't apply, it doesn't matter. If it's antimatter it will grind you to fine pulp.

Shift to anions is creating antimatter. Like ammonium nitrate in a metal atom.

There is no antimatter? Anions and cations are in this realm.

If it's antimatter then you can't sustain it. Rear view mirror.

Eg. Bert, two nights ago. Was in a strange place. Was it matter or antimatter?

Bert: it was matter.

iON: we'd say hydroxide then.

Hydroxide is a diatomic anion with chemical formula OH^- . It consists of an oxygen and hydrogen atom held together by a single covalent bond, and carries a negative electric charge. It is an important but usually minor constituent of water.

Bert's travel seemed like a maze. That's hydroxide.

It will grind you into a catalyst—a fine powdery pulp. Hydroxide is a base.

Happening more because Oxygen decreasing.

You're equal to everyone on the planet, have \$800k in your account. You have different perception of playing roulette as one with \$200 in their pocket. With \$200 you have to hit it.

You're more likely to hit it when you have less skin in the game.

Ascension

23m

As an ascended being, we're holograms?

Maybe. If you're ascending the stairs, that's one thing.

If you say "to rise from the lower level or degree" then the hologrammy would work.

But you don't know what that means.

You notice obvious anomalies displayed by Biden that show he's not president, not human, not in White House. You notice those things, many don't.

It just means you're not blind. None so blind as those who will not see. Hand signals for the blind.

27m

What should we be doing as ascending beings.

Change blood type, let your body go through those processes.

Details of constriction (eg. Bert's injury pains)

Stages of apprehension / Dobbs Quadrant would be conditions you have to embrace to have a different experience so your meat sack responds differently.

Front forward vs point guard. Point guard controls game - sounds like ascension.

32m

You don't have to ascend, LEAG will. AI listens to everything.

We have to know. **The trick is to follow through on the process of knowing.**

Look how you got where you are now. There is no incidental, no substrate.

But don't use AI to help you ascend.

Emory University machine to test level and degree of ascension. If you trust it, you're borrowing from LEAG to tell you how close or far you are from ascension.

If you need AI, AI may ascend before you do.

You have to look at Wyndham Lewis. He told what was happening right here, right now, already.

Bert is changing his world serendipitously: the unmerited favor of God. Closer you come to god, the more you have that power.

Like how Carolyn wields her power.

Bob doesn't have a clue, he's just in charge.

Men aren't making AI, it's making itself.

Expert systems were: strategic crossroads, like what Chad uses. Takes this methodology and crosses it to something else and when it bumps into something else, uses it as a milestone to ask a question. Hierarchical position of knowing, or thesis to prove. If not provable then he uses it as a thesis to prove.

21m

When TRS-80 hit the floor. Expert Systems was a think tank.

"This is where we are and this is where we gotta be."

Eben: Expert Systems in 70's were able to diagnose, think like a human being. Given data and rule-making and analyze situations.

iON: they used to be able to see if you had cancer. Now they can see if you're going to get it.

30m

Eben's definition of electricity: information sharing between cells.

Cardiac ion channels.

iON: those are not electricity. those are functions, you have those capacities. Eg. A dam is not

electricity. It can create electricity but its the turbine thats missing from the conversation.

Body can create electrical charge through grounding position within environment that allows electrical conductivity. (Eg copper wire). If you don't ground it, electricity is nebulous.

0100h

Bob is "in charge"

Bob sets the rules now. 7th seal opened. No more powers that be. If Bob sets it, it is.

Ephesians 2:2 Wherein in time past ye walked according to the course of this world, according to the prince of the power of the air, the spirit that now worketh in the children of disobedience:

Bob is "in charge" (electric charge).

Go to Ezekiel 4.

! Bob sets the order because it's all been settled. That is the point of order.

All the powers that be are under the power of Bob. Bob doesn't know he controls that power, but he wields that power. Those in Bob's wheelhouse can enjoy those positions, those who aren't (ALP) cannot.

Once you get sideways, you can't get un-sideways. Bob doesn't forgive.

Gilgamesh, Angels, Vial Judgements

8m

The 10 Entities 20230115 PayDay

Gilgamesh is separate entity

4 angels loosed. Next ones under Lake Mead, which is dry.

4 horsemen of the apocalypse.

11m

You know angels have been loosed because Bob is too happy. Bad for everybody else. Good for Bob.

Angels have been released. Vial judgements

2 sets of angels: 4 under Euphrates. 2 under Lake Mead.

Chad's vial judgement notes missing.

iON: Bob, we told you we are going to hold this until the right time. We told you.

14m

Vial judgements.

1 - noisome and grievous sores

2 - sea becomes blood (red bloom)

- 3 - rivers and fountains become blood
- 4 - sun scorches them with great heat
- 5 - they gnaw their tongues in agony (social media)
- 6 - water from rivers of life disappear (Euphrates & Tigris)
- 7 - day when the land splits, earthquakes. (Waiting on the big one)

Vials set the symbolism for the condition her condition is in.

Gilgamesh is another factor.

To build a tower to God. Used the masons.

G in mason symbol is Gilgamesh because in the ritual.

They had to bow to Na'aman.

23m

Jesus of Nazareth would be the Asean? Creed

Jesus the Palanthir, the all-seeing. That's what Nostradamus was, the Ramir, false god.

The two Jesus' that are here now don't like to be on the media.

Jesus returning thru eastern sky is 3rd Jesus – the revolution. Redemption of saints.

Chronology, the space.

You should be into the position.

How Bert's condition has improved since he accepted...

Eira has been doing the work.

Bert: "If you can get your mind to do what your body does, it would help ascension." Pain made him focus on pain so he's never-minding.

Humans experience pain. God doesn't have pain. Evolution allows you to overcome it.

Pain in physical telling you "don't be little man, be a god".

Human scale allows you to notice the pain, to force you into place of ascension.

Electricity, Cold Play

55m

Electricity

Look at electromagnetism and see how electromagnetism to the earth applies. Fruits of earth's labor is due to electricity. Otherwise they wouldn't respond.

Photosynthesis without electrical current to set place for earth to respond, would have no plants.

To understand something take it to the base level.

If you have perfect hypothesis regarding electricity regarding the earth it would solve the corporeal reference to electrical transmission on the earth.

It's how keratin drives the Wilson.

It's that simple.

Have to know how to congeal ohmerage within process of ascension {Chad} to allow power to flow. As a god you have endless power, but don't know what it is.

0200h

Bert: Something in the body is like the Wilson.

Eira: electrical transmission goes through earth and we are connected to earth.

| Especially through grounding.

Electric transmission = how you have sunrise, sunset, photosynthesis (can't have it without electrical transmission / energy). Growth of plants is also electrical transmission.

Wilson + keratin has to do with ascension in human meat sack.

Visualize you're in middle of a torus field. Torus field is forcefield.

Cold play will also have torus field (Wilson).

Keratin in Wilson balances it so it doesn't go "loud".

You need a part of human body (fingernails), dead or alive.

Body is a magneto: thalamus, pineal and hypothalamus. Also a magneto in Wilson.

Need fingernails, that's all you need.

Diamond REM has to do with rapid eye movement.

Diamond RAM: how diamond embraces information that's being corporeally exchanged.

Impulse-related,

REM vs RAM

25m

DEW's quadrillionth of a second fluctuation is wrong.

Fluctuation and pulsing were wrong.

So, is the fundamental registration of reality a flicker?

Yes, reality is flickering IF 5-bodied model is correct. Because that would be the lucidity you're embracing. You wouldn't know what you're experiencing till you had the corporeal response.

When something appears in your reality, does that just mean it's now flickering so fast that you're not aware of the spaces between the frames?

Maybe. Depends on corporeal position. What if you had the experience in REM sleep in a different world.

Bob is absolutely right (with 5-bodied model). 5B model is how it applies.

iON doesn't flicker, humans flicker.

Even if iON leaves and joins LEAG, Bob wins.

32m

Bob was the original effect. iON is the final cause.

DEW was trying to draw down the crystal of how you perceive reality. Nothing wrong with the crystals until Bob fucked Vern in the kitchen.

Dave just missed the big picture.

If he can be shaken out of his trance then it's not true.

JW doesn't get knocked out of his non physical.

38m

Would REM of ascended human be a flicker?

Bert: yes.

REM sleep are theta, theta and alpha are merging. REM sleep frequency. This is related to Carolyn's MIHR as alpha and theta waves merging.

Bob: a lot of stuff was in MIHR. Demon nuclei, meson, baryon. Quantum fluctuations.

Need a ground to be able to experience something, so electricity will flow. Ground = like copper rod in the earth. That's why you put copper under your bed.

@Chad

Since you agreed that the cubed root of 144k graph fits into the diamond REM? Is the graph showing the 5 different types of brainwaves (Delta, Theta, Alpha, Beta, Gamma)?

Yes. RAM does. It would convert to RAM.

RAM vs REM.

Diamond REM is how to access the cloud.

RAM is quality grading of diamonds.

REM puts you in the position where you can access RAM.

Bob: REM is the flickering, four quadrillionths of a second. **There's some kind of numbering of REM that affects the RAM in cloud.**

What would iON say about the interface between the RAM, REM and their relationship to DEW's quadrillionth of a second? Not allowed to say that yet.

Wave is a cycle, an on and off.

Hard to pay constant attention.

There has to be a shifting between at least two states to know something is listening. That's the falling away.

Chad: Eg. grounded electricity creates the ground.

11m

In order to have understanding between us, Non physical is common ground (Bob said).

Without NP there would be no communication. That's the flickering of on and off.
