Why Orchid?

Orchid VMS has been deployed in a variety of school settings, from independent districts to massive systems with over 10,000 cameras. Often able to incorporate multiple aspects of their existing systems, Orchid allows schools to gradually or immediately upgrade their camera recording and management with an easy-to-use and maintain solution that will carry them into the future.

“Orchid does not disappoint and has greatly improved our camera management. It is a truly agnostic solution that keeps our end-users happy.”

Allen Fox, MWP ISD

“Orchid support is top shelf; always responsive and takes the time to create the best options for their customers.”

DJ Provence, Sudan ISD

Product Highlights

Ease-of-Use

Each Orchid VMS version has the same refreshingly intuitive interface for end-users and administrators.

OS & Hardware Agnostic

Orchid is compatible with Windows and Linux devices, and utilizes ONVIF and RTSP protocols for cameras.

Same Day Support

Support from our in-house team located in Virginia in minutes, via our trouble ticket system or toll-free number 855.440.1077 M-F, 9am-8pm EST.

Maps & Camera Groups

Multiple ways to easily sort through cameras. Add maps, logical camera groups (e.g. all entrances) or saved camera layouts.

Customizable Permissions

Grant access to selected capabilities, cameras, and schools with specific users or user groups.

Case Management

The Orchid Library Feature provides digital signatures and secure sharing options, including links, to create a seamless case management experience.

Single Sign-On (SSO)

Enable your existing systems to automatically update access to cameras as users and roles change.

Targeted Search

Narrow down areas or external events of interest with the Smart Search and Events features.

Free Online Training

All versions of Orchid VMS offer self-paced online training for end-users, administrators and installs.
