Part X, Line 2	<p>Uncertainty in Income Taxes - the accounting standard on accounting for uncertainty in income taxes addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under that guidance, the agency may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by taxing authorities based upon the technical merits of the position. Examples of tax positions include the tax-exempt status of the agency and various positions related to the potential sources of unrelated business income (UBI). The tax benefits recognized in the financial statements from such a position are measured based upon the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. There were no unrecognized tax benefits identified or recorded liabilities for the year ended September 30, 2016.</p>
