

Follow my consumption and my payments is easy!

I go on the palm bus website where a specific portal
« credit card validation » is waiting for me. I create my own space
in 2 clics, I enter my card number and statement of my validations
and invoicing will be available.

**My ticket
is my credit card!**

My ticket is my credit card

The ticket «1 trip»

has the same features than the one bought to the bus driver or the « e-ticket ». It allows you to travel everywhere on the palm bus network except the shuttles city Palm, Forville/Suquet and Palm on demand with a correspondance allowed in the 59 minutes after you bought it (but not round trip).

IN CASE OF CORRESPONDENCE

I do exactly the same procedure but there will be not debit on my credit card.

IN CASE OF CONTROL

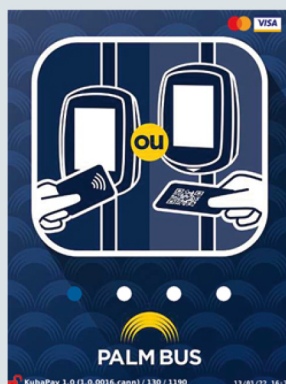

I show my credit card to the controller who will check the validity of my ticket with his control tester. Only this information concerning the trip will be read.

I TRAVEL ALONE...

So easy

I present my card in front of the validator

The screen is green, my ticket is ok*

*my bank account will be debited in the coming days

WARNING

If the validator refuses the transaction (too much expenses on my card or contactless not reached), I must absolutely buy the ticket to the bus driver or the E-ticket on my mobile.

Only the 1,70€ ticket «1 trip» can be paid contactless directly on the validator

with my credit card or my banking app on my smartphone.

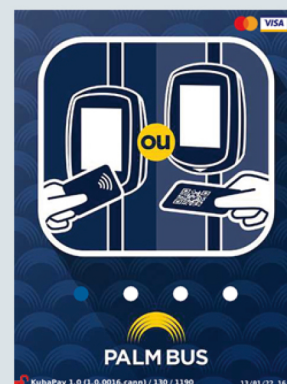

...OR WITH OTHER PEOPLE

Who are with me and I like to pay their ticket

I have to show my card 3 times in front of the validator

1 1st time for me

The screen is green: my ticket is validated

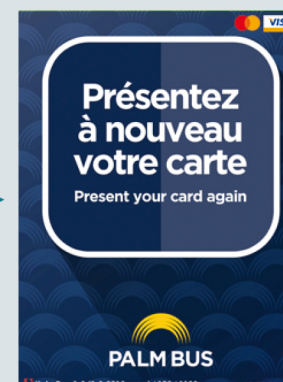

2 2nd time for my companions

A numeric keypad shows on: I enter the number of persons with me and I press «valid»

3 And one last time to complete my purchase

The screen is green: everyone is okay!

You can may with...
