

ISOLOCITY

A QMS perfectly paired for the food industry.

Manufacturers & Processors

- Document control and event management
- Inventory management and batch records
- Equipment maintenance, calibration and contamination management
- Inspections on incoming and finished products

R&D

- Create and maintain records for your corrective actions, deviations, non-conformance, and out-of-specifications
- Store, trend and analyze lab results

Distributors

- Receiving inspections for incoming products
- Create orders and shipments in Isolocity
- Ensure FIFO on all products and manage shelf life

We solve problems

Built-in automation improves turn-around-time on critical tasks, keeping your product safe.

Connect your entire workforce to controlled documents, training and quality events.

Secure cloud-based solution that empowers your global workforce.

Electronic batch records with full traceability, inventory management and more!

Award winning platform

Companies that have trusted us

Lean Data Management with our integrations

ISOLOCITY

Meet the **most recommended** QMS of 2024

Isolocity conforms to the requirements outlined in the ISO 9001 standard for QMS and cuts certification audit time by 50%

Isolocity is 3rd party GMP validated, i.e. it effectively supports GMP compliance for regulated industries, enhancing credibility.

Isolocity meets FDA's 21 CFR Part 11 & Annex 11 standards, ensuring compliance with regulations for electronic signatures and computerized systems.

Isolocity's FSMS meets SQF, HACCP, BRCGS, IFS and FSSC 22000 standards, streamlining certification processes and ensuring global compliance

Training

- Drag and drop test builder
- Link documents for revision training
- Track training insights
- Automate by scheduling a repeat frequency
- Train employee groups
- Track employee certifications

CAPA

- Custom built workflows and routings
- Automatically triggered for issues or events
- Activity due dates and reminders
- Use for deviations, non-conformances, out of specifications, complaints and change control

Document

- Categorize documents, keep track of version history
- Set review frequencies with multi-stage approval
- Link documents with change control and training
- Create hierarchy for document with child-parent linking

Lot & Batch

- Generate your EMBRs using our template builder
- Track every batch to inspection/documentation from raw material to final production
- Recall defective products instantly and track specific problematic raw materials

Risk Management

- Mitigate risks and drive PDCA for improvement
- Built-in HACCP and PFMEA risk management report
- Prepare and adapt before any issues arise

Part inspection & SPC

- Input inspection records directly into your QMS and track all data real-time including SPC data and inventory levels
- Proactively re-calibrate machine before creating waste
- Re-order raw material before your product even comes out of production.

Supply Chain

- Isolocity supplier portal tracks certificates and progresses any related quality events.
- Enable supply chain traceability
- Automate supplier scorecards

Internal Audit

- Automate audits with our audit workflow builder
- Set up frequencies and drag & drop template builder
- Manage all your audits : internal, supplier, regulatory, etc

Templates

- Create inspection criteria while storing characteristic information for generating process and item inspection
- Revision controlled templates that follow 21 CFR Part 11 guidelines
- Clone existing templates for similar items and processes

Dashboard

- Centralized dashboard for your compliance management system
- Action items and visual management enable efficient navigation
- All your key metrics at one place for quick review
