

Isometric Standard 1.6.0

Public Consultation Summary

Context

Isometric held a public consultation on the 1.6.0 update to its Isometric Standard, in order to receive stakeholder input.

The public consultation was announced on Isometric's website on the 31st of January, 2025. The Standard was open for general feedback until the 2nd of March, 2025. The feedback received was considered for incorporation into the Standard, and all stakeholders have been responded to.

This document summarizes the feedback received during the public consultation and the revisions included as a result of the comments.

We want to thank all participants for their time.

Summary of feedback received

Section	Comment	Resolution
2.4.3 Protocol Versioning Policy	Can you clarify which versions of the standard, protocols, and modules should be applied during the initial validation of a project?	Section 2.4.3 was clarified by introducing the following sentence: <i>"Projects are not required to adopt an updated version of a Protocol which is Certified after a Validation or Verification has already begun, however, a Project may choose to do so. For subsequent Validations or Verifications, Projects must adopt new Protocol versions in accordance with the other requirements in this section."</i>
