

The Leader in Digital Fragrance Creation and Delivery

Introducing Digital Fragrance Technology!

A gamer smells gunpowder while a grenade explodes on **CALL OF DUTY**

The COO of UBER is happy

UBER cars now offer a choice of 4 incredible aromas, chosen by the customer when ordering their ride

A **Marriott** hotel manager controls the scent in all 225 rooms 24/7.

The **CEO** controls the scent in all 8,000 properties worldwide...

LEVIS' fragrance branding is known to increase sales by 15%. The CEO wants to consistently diffuse it in all Levis' store worldwide while monitoring sales performance.

This is moodo

A proprietary digital fragrance and air-purification artificial intelligence and delivery technology platform.

How does it work and why Moodo?

Digital fragrance delivery requires a combination of technologies which we have perfected and patented over several years of R&D, product development and sales.

Cloud-based SW and AI engine creates customized ambiance algorithms and interfaces with other systems

Moodo app manages individual users and up to large networks of connected devices. Customized scent and air-purification protocols

Moodo diffusers for home, hotel and automotive are on the market

MoodoAir, a hybrid digital fragrance and air-purification system

Smart app-controlled fragrance capsules deliver pre-set and customized blends
