

HYPER PULSE

Purplelight **ALT** 

11
MINUTES

**For full body
hair removal
treatment**

Unprecedented
speed of 7Hz
(Pulses Per Second)

**A revolutionary
applicator
for body skin
tightening
treatments**

Based on an innovative
light beam technology for
non-invasive treatment
and rapid regeneration
of collagen and elastin
in skin tissue.

Suitable for women
after pregnancies
and weight changes.

High speed of maximum
3Hz (Pulses Per Second).

HYPER PULSE

Purplelight **ALT**

The innovative device for hair removal and a variety of skin and body treatments that accurately combines different wavelengths at specific frequencies and precise energy doses

This Hyper-Pulse system integrates BST technology, which activates skin tissue naturally without using chemical agents or invasive measures, and it does not require special preparation and recovery time. The treatment is suitable for areas where there is loose skin, lost shine and vitality, damaged skin tone, wrinkles and fine lines.

The system uses the innovative ALT state-of-the-art light beam technology, which delivers 7Hz powerful pulses of light per second, in a safer and much faster manner. These properties help to significantly increase the clinic's profits.

The device employs a cooling technology that is the first of its kind, using targeted freezing to

provide longer-lasting numbing throughout the treatment, rendering the treatment painless and with minimum side effects. The ergonomic applicator also contributes significantly to easier and more efficient treatment administration. Use does not require in-depth medical knowledge and it is incredibly safe.

Results of using the system

- By shrinking the tissue in the dermis layer, it visibly and measurably improves the skin's appearance and tightening of the treated area
- Massive collagen production results in a significant boost of vitality, shine, luminosity, and tissue uniformity
- Improved elastin activity results in significant minimization of wrinkles, stretch marks, and loose skin

The system is suitable for the following treatments

- Body skin texture
- Painless hair removal
- ST skin tightening and renewal
- SR lightening pigmentation spots
- Acne and problematic oily skin
- Treatments to create a uniform skin tone
- Vascular treatments
- Nail fungus treatments

The system's main properties

- ✓ Quick coverage of the work areas - 11 minutes for total body hair removal.
- ✓ A unique cooling system that numbs throughout the entire treatment.
- ✓ 7Hz work frequency (seven pulses per second) covering an area up to 52.5 cm² per second, at an energy of up to 40 J per cm² (up to 280 J per second).
- ✓ Facial treatments at a rate of 2Hz (two pulses per second).
- ✓ Body treatments at a rate of max 3Hz (three pulses per second).
- ✓ 7.5 | 3.5 | 1.2 cm² Applicators for hair removal and face treatment.
- ✓ Colorful touch screen with a user-friendly multi-lingual interface (Hebrew, English Russian and more).
